Details

Application Features: Premium grade, recessed, high performance direct/indirect architectural luminaire with two outer and one center inverted frosted acrylic lenses. For use in indoor applications where a LED luminaire with soft, low-glare illumination and modern styling is required.

Construction: Die formed and spot welded, 20 ga. cold rolled steel housing with precision formed, cold rolled steel arched reflector and die formed, cold rolled steel perforated lamp shield. Shielding flexes over mounting studs on housing for easy installation and re-lamping. Sufficient knock-outs provided on back of housing for flexible conduit attachment.

Electrical: Integral Driver

Approvals: Union made, ETL listed and manufactured in the US.

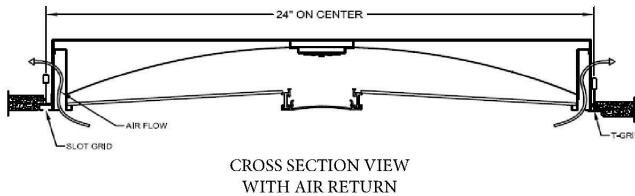

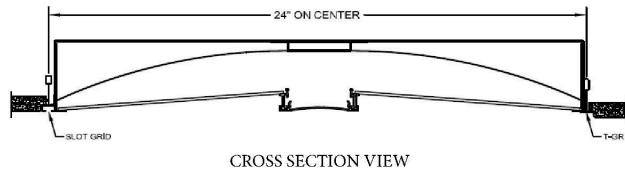

Mounting: Recessed mounting for T-Bar, Slot Grid or with Flange Kit for sheetrock ceiling installations.

Optics: Two outer and one inverted center frosted acrylic lenses

Options: Emergency Backup, Separate Circuit, Air Return Slots, 6' Whips.

B2142 1000, 1300, 2000, 2400, 3000 lm**Wide Beam, Directional Downlight**

4 1/8" Square Parabolic Trim, Xicato® XSM Remote Phosphor
MultiSource® Technology

Optics and Applications

Directional systems are designed with locking capability to rotate 360° and angulate 35°. Optics designed to control the rigors of sloped ceiling installations. Beam distributions can be changed in the field. Beam angle is 50°.

Design Features - MultiSource® Capable

Fixture housings are designed with MultiSource® plug and play connectors allowing field conversion to other sources. New lighting technologies will be incorporated as they become available assuring continuity. The fixture incorporates an aperture assembly which slides 1/4" in any direction and pivots 7° while maintaining optimum photometric performance. Proprietary passive heat sinks ensure proper temperatures are maintained. Service from below only. Maximum ceiling thickness is 1 1/2".

Modules

Xicato® XSM remote phosphor modules use high efficiency blue LEDs that convert to white light when directed through a phosphor lens. Fixture lumen packages are 1000 lm, 1300 lm, 2000 lm, 2400 lm and 3000 lm. Standard 80 CRI. 2700K, 3000K, 3500K, 4000K available. Rated Life is 50,000 hours at 70% lumen output.

Dimming Driver

Dimming is standard 0-10V/10%. See accessories for additional dimming options. Specify Voltage: 120 or 277.

Finish

Standard trim is anodized Softglow® clear. SoftSheen™ is a new finish that lowers apparent brightness due to remote phosphor sources. Colors available, see accessories. Steel parts are phosphate conditioned then painted matte black to suppress light leaks.

Warranty

5 year limited. See KV website for manufacturers details.

General

Fixture is pre-wired and thermally protected, UL and C-UL listed, for damp location and eight wire, 75°C, branch circuit wiring. All products are union made. Designed and manufactured in the USA.

- Specular colored cone multipliers, contact factory.
- SoftSheen™ cone multipliers, contact factory.
- Single unit Datachart pattern diameters are determined by the number of degrees from each side of nadir. Therefore a 15° diameter represents a total 30° pattern width. Footcandle values are at the edge of that diameter.
- The luminous efficacy (lm/W) refers to the total measured luminous flux (lumens) of the fixture divided by the total measured electrical input power (watts) of the complete fixture.

Notes

- Photometric Reports: B2142 KV Report No. 63013 for 1000 lm, B2142 LTL Report No. 26461-A for 1300 lm, B2142 LTL Report No. 26461-B for 2000 lm, B2142 KV Report No. 51414-B for 2400 lm and B2142 KV Report No. 51314-A for 3000 lm.
- Specular colored cone multipliers, contact factory.
- SoftSheen™ cone multipliers, contact factory.
- Single unit Datachart pattern diameters are determined by the number of degrees from each side of nadir. Therefore a 15° diameter represents a total 30° pattern width. Footcandle values are at the edge of that diameter.
- The luminous efficacy (lm/W) refers to the total measured luminous flux (lumens) of the fixture divided by the total measured electrical input power (watts) of the complete fixture.

Fixture Type:**F08****EVOKE® ROUND LENS DOWNLIGHT****4.75" ROUND LENSED DOWNLIGHT LED****APPLICATION:**

Commercial & hospitality ambient lighting

CONSTRUCTION:

20 ga. galvanized steel frame
 18 ga. galvanized steel splice housing and hanger brackets
 Die-cast aluminum heatsink
 Wet location option adds silicone flange gasket

OPTICS:

Spun aluminum self-flanged reflector, anodized finish
 High reflectance, highly diffuse mixing chamber
 Engineered nano technology lens provides transmission while concealing LED image

LED:

Color Temp Options: 2700K, 3000K, 3500K, 4000K

CRI: 83 (2700K, 3000K, 3500K, 4000K)

97 (2700K, 3000K)

Amerlux® Crisp White technology available

R9 Value: 11 (83 CRI), 92 (97 CRI)

Life: 50,000 hrs

Lumen Maintenance: >70% of initial lumens @ 50,000 hrs

Lumen Output at 3000K:

	16w	21w	30w	34w
T088 lm	1088 lm	1427 lm	2039 lm	2311 lm

ELECTRICAL:**Standard:**

Electronic constant current LED driver, 120v or 277v input
 ELV and Triac dimming standard, 120v or 277v.

This product complies with IEEE C62.41 for surge endurance up to 2.5kV. Amerlux recommends using additional surge protection with this unit (supplied by others), surge damage is not covered by warranty.

Options:

Dimming: 0-10v, DALI & Lutron Hi-Lume®/EcoSystem 3 wire
 See following pages for more information

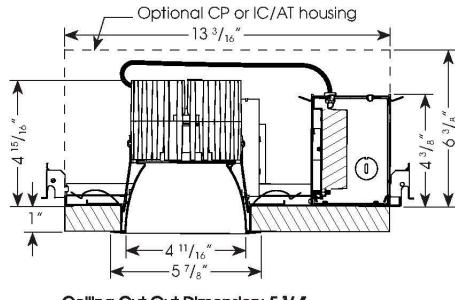

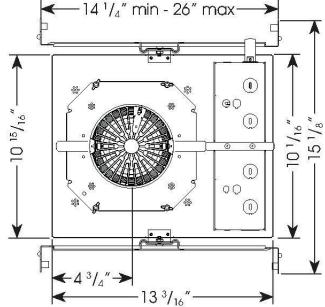

Emergency Battery Pack: IOTA ILB-CP05 Emergency battery pack with remote test switch, output of 5w (approx. 300 lumens) for 90 minutes.

MOUNTING:

For use in grid or sheetrock ceilings, max ceiling thickness 1"
 Consult factory for other thicknesses
 Hanger bars included

LABELING:

 pending to UL standards as tested by CSA
 IC/AT rated (optional, 21w only)
 Damp location (standard)
 Wet location (interior shower)

QUICKSHIP

EVOKE® 4.75 DOWNLIGHT

4.75" ROUND LENSED DOWNLIGHT LED

Amerlux® QuickShip makes it possible not only to keep up with expectations, but to keep ahead of them. We help enhance your competitive edge, ensuring you can start installation more quickly than you thought possible.

We can ship within 5-10 business days of your Amerlux QuickShip order, depending upon the selection.

- QuickShip must be clearly marked on all P.O.'s.
- Must note on P.O. if requesting frames ship first.
- Standard shipping terms apply.
- See terms & conditions below.

Quantity: 100 pieces or less

Housing: 5 days

Terms & Conditions

1. For QuickShip processing, please submit QuickShip items on separate purchase order and indicate "QuickShip" on order.
2. Configurations outside of what is displayed on the QuickShip program are not available under the QuickShip lead times.
3. Please contact Customer Support to process orders with quantities larger than those listed.
4. Orders will be entered within 24 hours of receipt of a clean purchase order. Lead times are calculated by business days from time of sales order confirmation. Orders will ship within QuickShip lead times or sooner.
5. Change orders and order cancellations cannot be processed after sales order confirmation is generated.
6. For freight allowed (greater than \$3,000), order will ship complete based on longest lead time item. Please indicate on PO if Partial Shipments are approved and indicate freight method. For partial shipments under \$3,000, customer will be invoiced for freight.
7. All Lead Times indicate when the fixture ships from Amerlux®. Arrival at destination is contingent upon carrier.

Expedite your orders by providing:

- Separate purchase order noting "QuickShip Program"
- Complete and accurate configurations
- Accurate pricing, quote number, shipping and contact information

Amerlux reserves the right to modify this program at any time.

EVOKE® ROUND LENS DOWNLIGHT

4.75" ROUND LENS DOWNLIGHT LED

TYPE:

E4.75RLD-A14
LED**DIMMING COMPATIBILITY:**

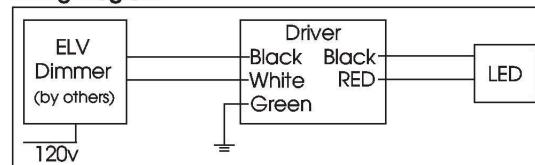

Amerlux® fixtures are compatible with all major dimming protocols prevalent in the United States. Please see below for general compatibilities and wiring diagrams. Amerlux recommends testing your unique dimming configuration as the exact full configuration (Dimmer, Fixture Quantity, Voltage, etc) may affect dimming performance.

ELV - Electronic Low Voltage (Reverse Phase) DIMMING (standard)

Utilizes specialized "ELV" dimmers. Best for New Construction applications

Notes:

- 120v or 277v
- Dims down to less than 5% light output (most cases)
- Consult Dimming manufacturer for installation instructions - DO NOT SHARE NEUTRALS!
- Must meet dimmer Minimum Load Requirements

Wiring Diagram**Compatible Dimmers****Wall Box (ELV Style)**

ETC "DRD" Rack w/ELV10
Module
Lutron Grafix Eye QS with
PHPM-PA Interface

TRIAC (Forward Phase) DIMMING (standard)

Utilizes "Standard" incandescent dimmers that are in wide use in installations across the US. Best for retrofit applications where Triac dimmers are installed.

Notes:

- 120v or 277v
- Dims down to less than 5% light output (most cases)
- Consult Dimming manufacturer for installation instructions - DO NOT SHARE NEUTRALS!
- Must meet dimmer Minimum Load Requirements per dimming manufacturer

ADJUSTABLE DOWNLIGHT

Manufacturer: LUCIFER *Fixture Wattage:* 9.8w
Fixture Line: DL8ZP (OBSOLETE) *Fixture Voltage:* 120
Fixture: ADJUSTABLE HALOGEN ROUND DOWNLIGHT *Load Type:* ELV
Catalog #: DL8ZP-FINSIH-LED-FGL-2 + DH-NIC-ZF-LED-10-120E
Mounting: RECESSED

Lamp Spec: (SORRA LAMP)
MR16-50-B01-12-930-25

DL8ZP

RECESSED DOWNLIGHT
ROUND ADJUSTABLE DUAL-AXIS

DL8ZP

DESCRIPTION

A Aiming

Two axes of adjustment; up to 45° tilt in ceilings up to 1" thick; 357° rotation; manually adjustable and lockable from above

B Special Features

Die-cast, deeply regressed round aperture; Professional Baffle minimizes aperture glare; sealed collar prevents light leak

C Effects Devices

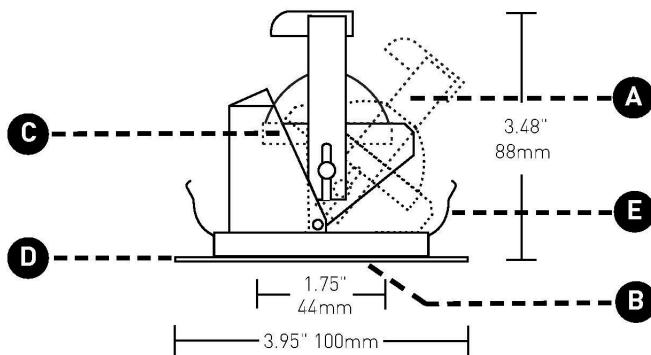

Frosted glass lens included; adjustable yoke allows secure placement of multiple effects devices (see chart below for total per light source)

D Trim Plate

Thickness measures 0.055"; install as zero-sightline or flange overlay

E Retention

Torsion spring clips accommodate varying ceiling thicknesses (up to 1") and ensure snug fit of trim against ceiling

TECHNICAL

CONSTRUCTION

Trim: Steel and aluminum; painted finishes are granulated powdercoat

HOUSING

See housing specifications (page 2)

LISTING

ETL listed in US and Canada for dry/damp locations

LAMP

MR-16 style lamp options: 12V halogen (HAL) *max wattage is housing dependent*; ceramic metal halide (HID) *max wattage is housing dependent*; light emitting diode (LED)

To ensure optimal results, it is recommended to specify lamps supplied by Lucifer Lighting* (see page 2)

WARRANTY

Manufacturer's one year warranty guarantees product(s) listed to be free from defects in material workmanship under normal use and service. Warranty is conditional upon use of manufacturer supplied transformer or ballast.

UNIVERSAL HOUSINGS

IC

For use with recessed downlights in IC accessible and non-accessible ceilings up to 1" thick. Transformer compartment and all splice connections may be serviced from room side. Certified Chicago Plenum and ASTM E283 Airtight version available. Hanging bars are included and can be fitted to all sides of the housing.

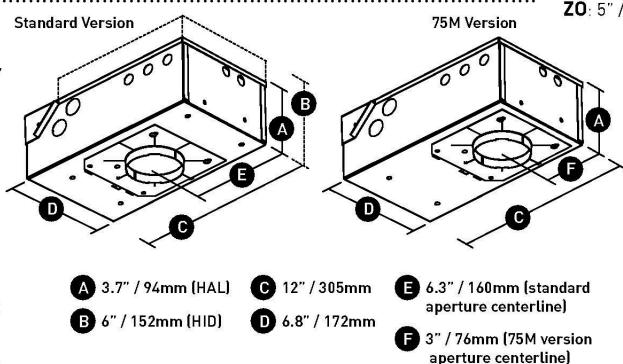

Maximum wattage: 50W for halogen, 20W for HID.

NON-IC

For use with recessed downlights in non-IC, accessible and non-accessible ceilings up to 1" thick. Transformer compartment and all splice connections serviceable from room side. Hanging bars are included and can be fitted to all sides of the housing for installation in spaces as narrow as 9".

Maximum wattage: 75W* for halogen, 39W for HID. HID version comes with extended top. The lowest profile housing (*see measurement A*) is for use with halogen lamp. *Note: 75 watt version has modified aperture centerline (*see measurement F*). Specify "75M" for max watts.

ZERO-SIGHTLINE

APPLIQUÉS

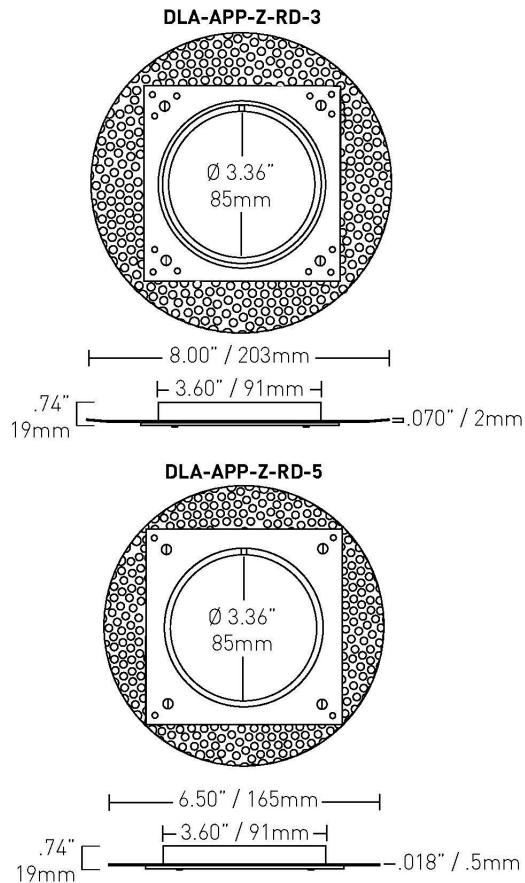

DESCRIPTION

• Appliquéd

Round and square appliqués are necessary to complete a Z Series zero-sightline installation. Available in standard and reduced profile versions. All models include a removable plaster plug to ensure flush trim fit after mudding.

DLA-APP-Z-RD-3 is recommended for all applications as it provides maximum structural reinforcement.

DLA-APP-Z-RD-5 has a thinner profile and smaller diameter and is optional for installations where a thinner profile to apply mudding is preferred.

TECHNICAL

CONSTRUCTION

Steel and aluminum, nylon screws

WARRANTY

Manufacturer's one year warranty guarantees product(s) listed to be free from defects in material or workmanship under normal use and service. Warranty is conditional upon use of manufacturer supplied transformer or ballast.

RECESSED DOWNLIGHT
ROUND FIXED

DL1ZP

DESCRIPTION

A Aiming

Fixed vertical lampholder

B Special Features

Die-cast Professional Baffle minimizes aperture glare; sealed collar prevents light leak

C Effects Devices

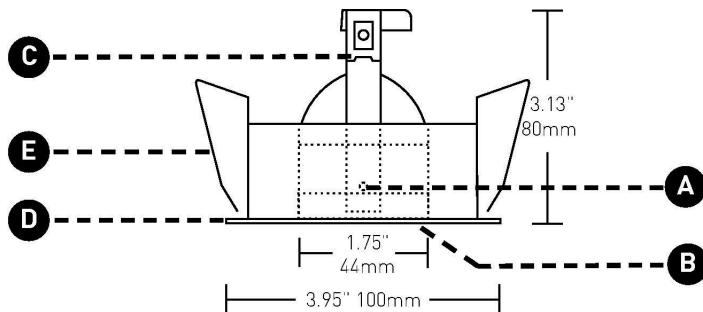

Frosted glass lens included; registered yoke allows secure placement of multiple effects devices (see chart below for total per light source)

D Trim Plate

Thickness measures 0.055"; install as zero-sightline or flange overlay

E Retention

Torsion spring clips accommodate varying ceiling thicknesses (up to 1") and ensure snug fit of trim against ceiling

TECHNICAL

CONSTRUCTION

Trim: Steel and aluminum; painted finishes are granulated powdercoat

HOUSING

See housing specifications (page 2)

LISTING

ETL listed in US and Canada for dry/damp locations

LAMP

MR-16 style lamp options. 12V halogen (HAL) *max wattage is housing dependent*, ceramic metal halide (HID) *max wattage is housing dependent*, light emitting diode (LED)

To ensure optimal results, it is recommended to specify lamps supplied by Lucifer Lighting* (see page 2)

WARRANTY

Manufacturer's one year warranty guarantees product(s) listed to be free from defects in material workmanship under normal use and service. Warranty is conditional upon use of manufacturer supplied transformer or ballast.

UNIVERSAL HOUSINGS

DL1ZP

IC

For use with recessed downlights in IC accessible and non-accessible ceilings up to 1" thick. Transformer compartment and all splice connections may be serviced from room side. Certified Chicago Plenum and ASTM E283 Airtight version available. Hanging bars are included and can be fitted to all sides of the housing.

Maximum wattage: 50W for halogen, 20W for HID.

- (A) 6.1" / 155mm
- (B) 16.3" / 414mm
- (C) 10" / 254mm
- (D) 7.2" / 183mm (aperture centerline)

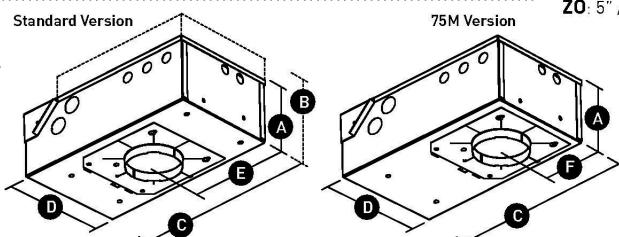

Ceiling cut-out diameter
ZF: 3.5" / 89mm

ZO: 5" / 127mm

NON-IC

For use with recessed downlights in non-IC, accessible and non-accessible ceilings up to 1" thick. Transformer compartment and all splice connections serviceable from room side. Hanging bars are included and can be fitted to all sides of the housing for installation in spaces as narrow as 9".

Maximum wattage: 75W* for halogen, 39W for HID. HID version comes with extended top. The lowest profile housing (*see measurement A*) is for use with halogen lamp. *Note: 75 watt version has modified aperture centerline (*see measurement F*). Specify "75M" for max watts.

- (A) 3.7" / 94mm (HAL)
- (B) 6" / 152mm (HID)
- (C) 12" / 305mm
- (D) 6.8" / 172mm
- (E) 6.3" / 160mm (standard aperture centerline)
- (F) 3" / 76mm (75M version aperture centerline)

ZERO-SIGHTLINE

APPLIQUÉS

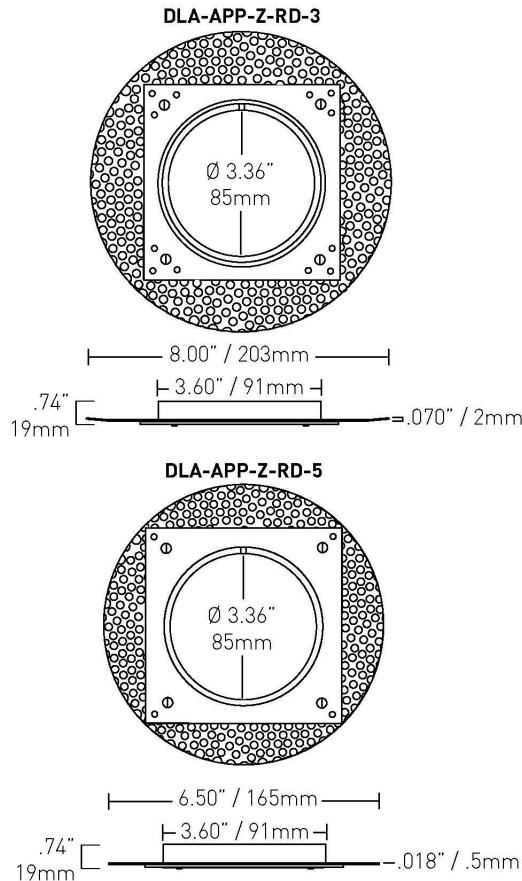

DESCRIPTION

• Appliquéd

Round and square appliqués are necessary to complete a Z Series zero-sightline installation. Available in standard and reduced profile versions. All models include a removable plaster plug to ensure flush trim fit after mudding.

DLA-APP-Z-RD-3 is recommended for all applications as it provides maximum structural reinforcement.

DLA-APP-Z-RD-5 has a thinner profile and smaller diameter and is optional for installations where a thinner profile to apply mudding is preferred.

TECHNICAL

CONSTRUCTION

Steel and aluminum, nylon screws

WARRANTY

SAFETY NOTE ON HEAT

Soraa's unique LED technology allows its lamps to operate effectively and efficiently at higher temperatures than other LED lamps, resulting in more light output per diode. Although Soraa's lamps operate at cooler temperatures than halogen lamps, it is recommended that gloves be worn when handling bare lamps that have been energized.

TRANSFORMER/DIMMER COMPATIBILITY

Dimmable to 20% or lower, depending on dimmer. Complete transformer and dimmer compatibility information available at www.soraa.com.

Information and specifications subject to change. Rev R 06.01.14 D-110133

Kore LED Linear

Category:

Interior/Exterior Ceiling & Wall Surface

- Material:** Kore LED Linear: Aluminum and steel recessed driver enclosure for driver with aluminum trim with a frosted acrylic tubular diffuser. Use of silicone sealant material for Wet Location.
- Finish:** Anodized Aluminum (AL). Contact factory custom finishes.
- Kore:** Kore Linear Surface 16" (KLS16), Kore Linear Surface 25" (KLS25), Kore Linear Surface 38" (KLS38), Kore Linear Surface 48" (KLS48).
- Shades:** Refer to [Spec Sheet 55](#) and [Spec Sheet 57](#) for Slot and Weave decorative shades. Contact factory for Wet Location Shade options.
- Source:** KLS16: Standard Output 7W @ 550 Lumens, High Output 14W @ 1100 Lumens. KLS25: Standard Output - 14W @ 1100 Lumens, LED High Output - 28W @ 2200 Lumens. KLS38: Standard Output - 21W @ 1650 Lumens, LED High Output - 49W @ 3300 Lumens. KLS48: Standard Output - 28W @ 2900 Lumens, LED High Output - 56W @ 4400 Lumens. 80-85 CRI typical. All values are initial lumens. For exact lumen output and wattage consumption data, please consult LM-79 reports. Power consumption does not include driver losses. 3000K and 4000K LED standard.
- Optics:** Refer to [Photometric Report](#) for details.
- Power Supply:** **KLS16:** Standard Output Non-Dimming Driver 120V or 277V (DSO), High Output Non-Dimming Driver 120 or 277V (DHO), High Output Dimming Driver 0-10V 120 or 277V (DHO-DM-0-10V), High Output - Non-Dimming/Dimming Driver - Lutron 120/277V (DHO-LUT). **KLS25:** Standard Output Non-Dimming Driver 120V or 277V (DSO), Standard Output Dimming Driver 0-10V 120 or 277V (DSO-DM-0-10V), Standard Output -Non-Dimming/Dimming Driver - Lutron120/277V (DSO-LUT), High Output Non-Dimming Driver 120 or 277V(DHO), High Output Dimming Driver 0-10V 120/277V (DHO-DM-0-10V), High Output - Non-Dimming/Dimming Driver - Lutron 120/277V (DHO-LUT). **KLS38:** Standard Output Non-Dimming Driver 120V or 277V (DSO), High Output Non-Dimming Driver 120 or 277V (DHO), High Output Dimming Driver 0-10V 120 or 277V (DHO-DM-0-10V), High Output - Non-Dimming/Dimming Driver - Lutron 120/277V (DHO-LUT). **KLS48:** Standard Output Non-Dimming Driver 120V or 277V (DSO), High Output Non-Dimming Driver 120 or 277V (DHO), High Output Dimming Driver 0-10V 120 or 277V (DHO-DM-0-10V), High Output - Non-Dimming/Dimming Driver - Lutron 120/277V (DHO-LUT). Refer to Driver table on page 5 for details.
- Installation:** Horizontal, vertical; wall or ceiling mount. The recessed driver enclosure, which functions as a custom j-box, is installed into new construction with adjustable brackets for electrical connections, with gypsum or other coverings installed around and up to the edge of the aperture of the housing. The Kore LED Linear fixture is then connected to the housing with electrical connections and supplied mechanical fasteners (supplied). The diffuser is attached last, resulting in a hardware-free aesthetic. Refer to [Installation Sheet](#) for more details.
- Sidekicks:** [Kore LED Linear Pendant](#), [Moz Slot Recessed Wall](#), [Moz Slot Surface Wall](#)
- Labels:** CSA listed – Tested to USA UL/ANSI standards #8750 and #1598 and Canadian standards CSA C22.2, # 250.0-08 & #250.13-12. Interior, Damp and Wet applications. ADA-Compliant. LM79/80. In a continuing effort to offer the best product possible we reserve the right to change, without notice, specifications or materials. Technical specification sheets that appear on teganlighting.com are the most recent version and supersede all other versions that exist in any other printed or electronic form. 3 Year Warranty.

Kore LED Linear

Interior/Exterior Ceiling & Wall Surface

Example: TG - KLS-25 - AL - LED - 120V - DSO-LUT

Notes:

¹ Shades are specified separately from the Kore LED Ambient Quadrant Pendant(s) but are designed to easily attach. Refer to the links on page 1 to specify a luminaire with a shade. Refer to compatibility chart on page 5 for details.

² Select one.

³ Refer to Driver table on page 5 for details.

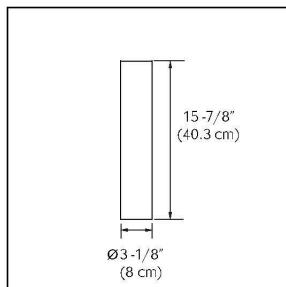

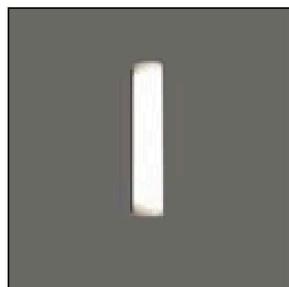

⁴ Tegan LED emitters, like all LEDs, undergo a natural depreciation in lumen output. This depreciation is within the specifications of LM-80. Extreme ambient temperatures, dusty environments, and power conditions may affect the depreciation. Wattage requirements and lumen output are subject to change with ongoing developments in LED technology.

⁵ Leave blank or add the shade catalog number when specifying a luminaire with a shade. Refer to the compatibility chart on page 4 for a catalog number example. Refer to the Shade specification sheets for details.

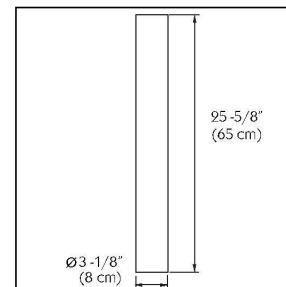

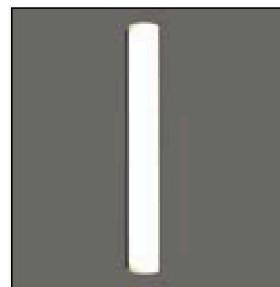

⁶ Contact factory for Wet Location Decorative Shade Options or to "design your own shade."

⁷ Contact factory for DSO-DM-0-10V for KLS-16.

Notes:

¹ Refer to manufacturer's spec sheets for compatible controls and additional detail.

² Due to the rapidly evolving technology for Semiconductor products, Tegan driver options are subject to change at any time, without notice. In addition, if any of the standard drivers are out of stock or discontinued, Tegan Lighting will supply an equal as needed. Tegan can also supply alternative drivers upon request; contact the factory for details.

³ Tegan LED emitters, like all LEDs, undergo a natural depreciation in lumen output. This depreciation is within the specifications of LM-80. Extreme ambient temperatures, dusty environments, and power conditions may affect the depreciation. Wattage requirements and lumen output are subject to change with ongoing developments in LED technology.

TYPE: _____

SIDE VIEW**FACEPLATE DETAIL****Accessories** (Configure separately)**Remote options:**

TR Series

PMRM™

UNIVERSAL RINGAll dimensions indicated on this submittal are nominal.
Contact Technical Sales if you require more stringent specifications.**SPECIFICATIONS****GreenSource Initiative™**

Metal and packaging components are made from recycled materials. Manufactured using renewable solar energy, produced onsite. Returned to manufacturer at end of life to ensure cradle-to-cradle handling. Packaging contains no chlorofluorocarbons (CFC's). Use of this product may qualify for GreenSource efficacy and recycling rebate(s). Consult www.bklighting.com/greenresource for program requirements.

Materials

Furnished in Copper-Free Aluminum (Type 6061-T6), Brass (Type 360) or Stainless Steel (Type 316).

Backbox

Round, 4-1/4" dia. x 3-1/8" deep construction with [2] mounting tabs. Front access for wire connection and inspection. Provided with [5] 1/2" NPS tapped holes and [4] plugs. Suitable for concrete pour.

Faceplate

Fully machined from solid billet. Countersunk holes provide for flush hardware mounting with [2] tamper-resistant, stainless steel mounting screws. Stainless steel universal mounting ring for faceplate adjustment and 1/8" thick HT-805A silicone foam gasket with acrylic adhesive for watertight seal. Accommodates [1] lens or louver media.

Lens

Shock resistant, tempered, glass lens is factory adhered to faceplate. Specify soft focus (#12) or rectilinear (#13) lens.

BKSSL®

Integrated solid state system with 'e' technology is scalable for field upgrade. Modular design with electrical quick disconnects permit field maintenance. High power, forward throw source complies with ANSI C78.377 binning requirements. Exceeds ENERGY STAR® lumen maintenance requirements. LM-80 certified components.

Integral, constant current driver. 12VAC/VDC input. 50/60Hz. Proprietary input control scheme achieves power factor correction and eliminates inrush current. Output, over-voltage, open-circuit, and short circuit protected. Inrush current limited to <1A (non-dimming). Conforms to Safety Std. C22.2 No. 250.13-12.

Line dimmable. For use with low voltage dimmer with dedicated neutral conductor. Minimum 25 watt load required for dimming.

Optics

Interchangeable OPTIKIT™ modules permit field changes to optical distribution. Color-coded for easy reference. Narrow Spot (NSP) = Red. Spot (SP) = Green. Medium Flood (MFL) = Yellow. Wide Flood (WFL) = Blue. Adjustable optical bracket provides up to 24° vertical aiming.

Adjust-e-Lume® (Pat. Pending)

Integral electronics allows dynamic lumen response at the individual fixture. Indexed (100% to 25% nom.) lumen output. Maintains output at desired level or may be changed as conditions require. Specify factory preset output intensity.

Transformer

For use with 12VAC **BKSSL** remote transformer.

Wiring

Teflon® coated, 18AWG, 600V, 250°C rated and certified to UL 1659 standard.

Hardware

Tamper-resistant, stainless steel hardware. Faceplate screws are additional black oxide treated for additional corrosion resistance.

Finish

StarGuard®, our exclusive RoHS compliant, 15 stage chromate-free process cleans and conversion coats aluminum components prior to application of Class 'A' TGIC polyester powder coating. Brass components are available in powder coat or handcrafted metal finish. Stainless steel components are available in handcrafted metal finish. (Brushed finish for interior use only).

Warranty

5 year limited warranty.

Certification and Listing

ETL tested to IESNA LM-79. Lighting Facts Registration per USDOE (www.lightingfacts.com). ETL Listed to ANSI/UL Standard 1838 and UL Subject 8750 and Certified to CAN/CSA Standard C22.2 No. 9. RoHS compliant. Suitable for indoor or outdoor use. Suitable for installation in combustible materials (Type Non-IC). Suitable for use in wet locations. Suitable for installation within 4' of the ground. IP65 Rated. Made in USA.

*Teflon is a registered trademark of DuPont Corporation.

*Energy Star is a registered trademark of the United States Environmental Protection Agency.

SPECIFICATIONS**Housing**

Stainless steel, NEMA Outdoor 3R rated enclosure. [2] (TR60) or [3] (TR150-600) bottom entry 7/8" knockouts provide access to wiring compartment. Riveted, hinged cover opens vertically from bottom to top for service access.

Transformer

Fully encapsulated, Class B insulated, low voltage magnetic transformer. 120VAC or 277VAC input. 12VAC output (fully loaded). 0.6A (120VAC) or 0.3A (277VAC) maximum no load input current. Manual thermal reset. Secondary circuit breaker. Enclosure temperature <65° C when fully loaded (in 40° C ambient).

For use with halogen and products. Fully dimmable utilizing magnetic low voltage dimmers. Consult fixture specification for dimming capability.

Output Wiring

See B-K Lighting Low Voltage Design Guide on reverse.

Warranty

Limited five year warranty.

Certification and Listings

Nema Type 3R Enclosure. Suitable for indoor and outdoor use. UL Listed to ANSI/UL Standard 1012.

Low Voltage Guide

Many B-K LIGHTING fixtures operate on 12 volts. Taking advantage of these energy-saving fixtures requires appropriate care in planning the electrical wiring system. To maintain expected lamp performance, we recommend the following procedures in sizing your low-voltage wiring system.

SIZING OF LOW VOLTAGE WIRING

1. Locate and plot fixtures on plan. Choose the lighting equipment necessary to create the desired lighting effects. Mark lamp wattage for each fixture location.
2. Identify potential transformer locations. The ideal locations are those which provide for the shortest possible low voltage distances (inconspicuous areas, behind rocks, shrubbery, etc., within the landscape). UPM, Power Pipe™, Power Pipe II™, or, if available, transformers integral in the fixture are good ways to hide the transformer and reduce voltage drop problems.
3. Add the total wattage for the proposed low voltage run. Measure the wire lengths from the transformer to the fixture locations. Find the distance to the "CENTER OF LOAD" of the low voltage run.

$$\text{CENTER OF LOAD} = \frac{\text{Distance from first to last fixture}}{(2) \text{ Two}} + \text{Distance from transformer to first fixture}$$

4. Using the B-K LIGHTING Wire Selection Table, select the wattage column which applies. Look down the column stopping at a distance, in feet, that is equal or greater than the "CENTER OF LOAD" distance. Look across to find the proper wire size for your layout.

Note: In the event of multiple runs from a given transformer, treat each run separately.

12-VOLT WIRE SELECTION TABLE

WIRE SIZE	TOTAL WATTAGE																
	12	20	24	35	40	50	60	70	80	100	105	120	140	150	160	200	250
12	178	106	89	60	53	42	35	30	26	21	20	17	15	13	—	—	—
10	283	169	141	96	85	67	56	48	42	33	32	28	24	22	19	17	13
8	450	269	225	154	135	107	90	77	67	54	51	45	38	36	31	27	21
6	715	428	357	245	214	171	143	122	107	85	81	71	61	57	49	42	34

CENTER OF LOAD WIRING DISTANCES IN FEET

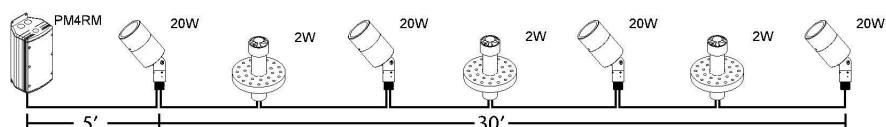

The Wire Selection Table provided is based on a maximum allowable voltage drop of 5%. Electrical designs which allow greater than 5% voltage drop, reduce rated light output beyond acceptable levels.

The importance of the proper wire selection is demonstrated below. Both examples have the same total watts and identical overall lengths of wire run, yet require different wire sizes, or multiple wire runs, to operate within the 5% maximum voltage drop B-K LIGHTING criteria.

EXAMPLE:

Total wattage:
 $(20w \times 4) + (2w \times 3) = 86$ watts

CENTER OF LOAD:
 $(\frac{30'}{2}) + 5' = 20'$

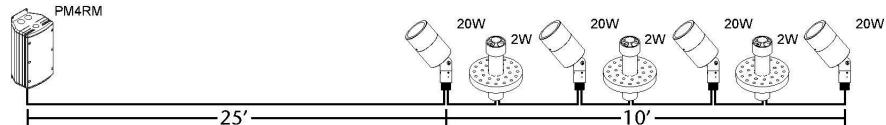

SINGLE WIRE RUN:
12 gauge

EXAMPLE:

Total wattage:
 $(20w \times 4) + (2w \times 3) = 86$ watts

CENTER OF LOAD:
 $(\frac{10'}{2}) + 25' = 30'$

SINGLE WIRE RUN:
10 gauge

TRANSFORMERS

For areas which are far reaching from fixtures, running 120 volt power to each fixture location with individual transformers, such as TRSS75 or TRSS150, provides an excellent economic solution to voltage drop. These transformers can also be specified in the UPM, Power Pipe™, and Power Pipe II™ transformer housings.

Note: Installations should be in accordance with the National Electric Code and applicable local codes.

PMRM™

All dimensions indicated on this submittal are nominal.
Contact Technical Sales if you require more stringent specifications.

SPECIFICATIONS

GreenSource Initiative™

Metal and packaging components are made from recycled materials. Manufactured using renewable solar energy, produced onsite. Returnable to manufacturer at end of life to ensure cradle-to-cradle handling. Packaging contains no chlorofluorocarbons (CFC's). Use of this product may qualify for GreenSource efficacy and recycling rebate(s). Consult www.bklighting.com/greensource for program requirements.

Materials

Furnished in Copper-Free Aluminum (Type 6061-T6), Brass (Type 360) or Stainless Steel (Type 304).

Core Drill

Allows for mounting into existing structures that will not easily accept a standard box. 2-1/2" dia. hole required for slip fit.

Body

Fully machined from solid billet. Unibody design provides enclosed, water-proof wireway and integral heat sink for maximum component life. High temperature, silicone 'O' Ring provides water-tight seal. Provided with hard-coat (Type III) black anodize finish for maximum corrosion resistance. Weather-tight cable connector with 50°, 18Ga, 2 wire low voltage cable.

Faceplate

Fully machined from solid billet. Countersunk holes provide for flush hardware mounting (by others). Accommodates [1] lens or louver media.

Lens

Flush mount, shock resistant, tempered, glass lens is factory adhered to faceplate and provides hermetically sealed optical compartment. Specify soft focus (#12) or rectilinear (#13) lens.

BKSSL®

Integrated solid state system with 'e' technology is scalable for field upgrade. Modular design with electrical quick disconnects permit field maintenance. High power, forward throw source complies with ANSI C78.377 binning requirements. Exceeds ENERGY STAR® lumen maintenance requirements. LM-80 certified components.

Integral, constant current driver. 12VAC/VDC input. 50/60Hz. Proprietary input control scheme achieves power factor correction and eliminates inrush current. Output, over-voltage, open-circuit, and short circuit protected. Inrush current limited to <1A (non-dimming). Conforms to Safety Std. C22.2 No. 250.13-12.

Line dimmable. For use with low voltage dimmer with dedicated neutral conductor. Minimum 25 watt load required for dimming.

Optics

Interchangeable OPTIKIT™ modules permit field changes to optical distribution. Color-coded for easy reference: Narrow Spot (NSP) = Red. Spot (SP) = Green. Medium Flood (MFL) = Yellow. Wide Flood (WFL) = Blue.

Adjust-e-Lume® (Pat. Pending)

Integral electronics allows dynamic lumen response at the individual fixture. Indexed (100% to 25% nom.) lumen output. Maintains output at desired level or may be changed as conditions require. Specify factory preset output intensity.

Adjust-e-Lume® (Pat. Pending)

Integral electronics allows dynamic lumen response at the individual fixture. Indexed (100% to 25% nom.) lumen output. Maintains output at desired level or may be changed as conditions require. Specify factory preset output intensity.

Transformer

For use with 12VAC remote transformer.

Wiring

Teflon® coated, 18AWG, 600V, 250° C rated and certified to UL 1659 standard.

Hardware

Tamper-resistant, stainless steel hardware. Mounting hardware by others.

Finish

StarGuard®, our exclusive RoHS compliant, 15 stage chrome-free process cleans and conversion coats aluminum components prior to application of Class 'A' TGC polyester powder coating. Brass components are available in powder coat or handcrafted metal finish. Stainless steel components are available in handcrafted metal finish. (Brushed finish for interior use only).

Warranty

5 year limited warranty.

Certification and Listing

ETL tested to IESNA LM-79. Lighting Facts Registration per USDOE (www.lightingfacts.com). ETL Listed to ANSI/UL Standard 1838 and UL Standard 8750 and Certified to CAN/CSA C22.2 No. 9, CSA TIL B-588. RoHS compliant. Suitable for indoor or outdoor use. Suitable for installation in combustible materials (Type Non-IC). Suitable for use in wet locations. Suitable for installation within 4' of the ground. IP65 Rated. Made in USA.

*Teflon is a registered trademark of DuPont Corporation.

SPECIFICATIONS**Housing**

Stainless steel, NEMA Outdoor 3R rated enclosure. [2] (TR60) or [3] (TR150-600) bottom entry 7/8" knockouts provide access to wiring compartment. Riveted, hinged cover opens vertically from bottom to top for service access.

Transformer

Fully encapsulated, Class B insulated, low voltage magnetic transformer. 120VAC or 277VAC input. 12VAC output (fully loaded). 0.6A (120VAC) or 0.3A (277VAC) maximum no load input current. Manual thermal reset. Secondary circuit breaker. Enclosure temperature <65° C when fully loaded (in 40° C ambient).

For use with halogen and products. Fully dimmable utilizing magnetic low voltage dimmers. Consult fixture specification for dimming capability.

Output Wiring

See B-K Lighting Low Voltage Design Guide on reverse.

Warranty

Limited five year warranty.

Certification and Listings

Nema Type 3R Enclosure. Suitable for indoor and outdoor use. UL Listed to ANSI/UL Standard 1012.

Low Voltage Guide

Many B-K LIGHTING fixtures operate on 12 volts. Taking advantage of these energy-saving fixtures requires appropriate care in planning the electrical wiring system. To maintain expected lamp performance, we recommend the following procedures in sizing your low-voltage wiring system.

SIZING OF LOW VOLTAGE WIRING

1. Locate and plot fixtures on plan. Choose the lighting equipment necessary to create the desired lighting effects. Mark lamp wattage for each fixture location.
2. Identify potential transformer locations. The ideal locations are those which provide for the shortest possible low voltage distances (inconspicuous areas, behind rocks, shrubbery, etc., within the landscape). UPM, Power Pipe™, Power Pipe II™, or, if available, transformers integral in the fixture are good ways to hide the transformer and reduce voltage drop problems.
3. Add the total wattage for the proposed low voltage run. Measure the wire lengths from the transformer to the fixture locations. Find the distance to the "CENTER OF LOAD" of the low voltage run.

$$\text{CENTER OF LOAD} = \frac{\text{Distance from first to last fixture}}{(2) \text{ Two}} + \text{Distance from transformer to first fixture}$$

4. Using the B-K LIGHTING Wire Selection Table, select the wattage column which applies. Look down the column stopping at a distance, in feet, that is equal or greater than the "CENTER OF LOAD" distance. Look across to find the proper wire size for your layout.

Note: In the event of multiple runs from a given transformer, treat each run separately.

12-VOLT WIRE SELECTION TABLE

WIRE SIZE	TOTAL WATTAGE																
	12	20	24	35	40	50	60	70	80	100	105	120	140	150	160	200	250
12	178	106	89	60	53	42	35	30	26	21	20	17	15	13	—	—	—
10	283	169	141	96	85	67	56	48	42	33	32	28	24	22	19	17	13
8	450	269	225	154	135	107	90	77	67	54	51	45	38	36	31	27	21
6	715	428	357	245	214	171	143	122	107	85	81	71	61	57	49	42	34

CENTER OF LOAD WIRING DISTANCES IN FEET

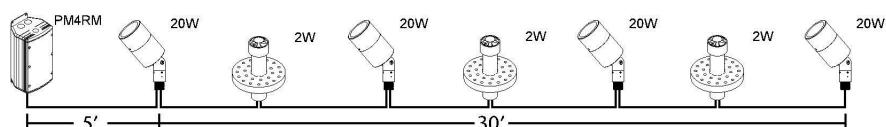

The Wire Selection Table provided is based on a maximum allowable voltage drop of 5%. Electrical designs which allow greater than 5% voltage drop, reduce rated light output beyond acceptable levels.

The importance of the proper wire selection is demonstrated below. Both examples have the same total watts and identical overall lengths of wire run, yet require different wire sizes, or multiple wire runs, to operate within the 5% maximum voltage drop B-K LIGHTING criteria.

EXAMPLE:

Total wattage:
 $(20w \times 4) + (2w \times 3) = 86$ watts

CENTER OF LOAD:
 $(\frac{30'}{2}) + 5' = 20'$

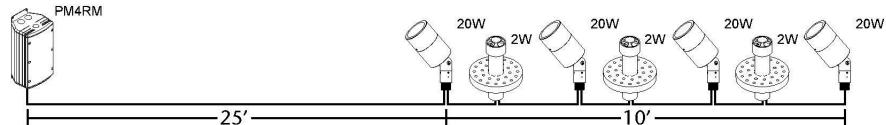

SINGLE WIRE RUN:
12 gauge

EXAMPLE:

Total wattage:
 $(20w \times 4) + (2w \times 3) = 86$ watts

CENTER OF LOAD:
 $(\frac{10'}{2}) + 25' = 30'$

SINGLE WIRE RUN:
10 gauge

TRANSFORMERS

For areas which are far reaching from fixtures, running 120 volt power to each fixture location with individual transformers, such as TRSS75 or TRSS150, provides an excellent economic solution to voltage drop. These transformers can also be specified in the UPM, Power Pipe™, and Power Pipe II™ transformer housings.

Note: Installations should be in accordance with the National Electric Code and applicable local codes.

PLFRESNEL1 LED Luminaire

The PLFRESNEL1 LED Luminaire is a general purpose lighting fixture for theatre, small studio, and display lighting applications. It produces an adjustable cone of light with a soft edge which is easily blended with adjacent beams to provide even illumination. Using LED source technology combined with a traditional Fresnel lens, the PLFRESNEL1 LED Luminaire delivers Philips Selecon's industry benchmark quality without the compromising performance of spreader lenses.

A key benefit of the PLFRESNEL1 LED Luminaire is that it is no longer necessary to change lamps or color filters. Combining the superior control and light quality of a Philips Selecon Fresnel with seamless fading between colors allows designers a new level of creativity. Less power consumption and no dimmer circuits makes the PLFRESNEL1 LED Luminaire the obvious choice for any stage lighting need.

The PLFRESNEL1 also hosts smart cable management with the inclusion of PLICB (PL Interconnect Box). The PLICB mounts to the luminaires yoke, between the C-Clamp and the yoke and swivels independently to allow for the luminaire to move freely through its focus range with no need for a cable service loop. The PLICB allows for all of the luminaires cabling with DMX and PowerCon in and through Connections.

Features

- Delivers the performance of a 500 watt fresnel fixture with a maximum power consumption of 150 watts
- Variable beam angle from 15 to 54 degrees
- Infinite color choice from the RGBW engine and supporting color temperatures from 2700K to 5600K in white
- Homogenized fully mixed color output light, no multiple color shadows
- Ten's of thousands of hours of life expectancy
- Quick selection of Warm White, Cool White, and Daylight
- User defined on board presets states available to record your color composition
- Color presets simplifies matching existing light sources
- Constant color balance down to very low light levels irrespective of intensity setting
- DMX512 Input/Output with 8 or 16-bit resolution or a simple 3-channel control (PLICB)

- On-board LCD menu for ease of luminaire set up and addressing
- No ultra-violet (wavelengths of less than 400nm) – for UVA, B or C or the Infrared spectrum (wavelengths of more than 775nm)
- Luminaire color: black
- Electronic universal power supply 100-240VAC
- PowerCon In and Through connectors (PLICB)
- Electronic power supply; ETL / cETL approved and CE marked

PLFRESNEL1 LED Luminaire

PLFRESNEL1 LED Luminaire

Advanced Control

The PLFRESNEL1 LED luminaire has an on-board LCD menu system for luminaire setup, control, and addressing. The menu system is extremely user-friendly and offers all configuration options with a few button presses.

Console Control

All PLFRESNEL1 luminaires support wired and wireless DMX512 control with a choice of 8 or 16 bit control resolution or simple 3-channel control. With the increased development of LED luminaires like PL1 and PL3 with 4 or more colors additional control is needed for intuitive operation. All Strand Lighting NEO and Palette family controls support extended color control and color temperature control to simplify programming and luminaire color matching.

PLFRESNEL1 LED Engine

The PLFRESNEL1 luminaire's powerful LED engines offer exceptional performance and life. Under normal operating conditions our LED engine has a potential life expectancy of up to 50,000 hours, however under worst case operating conditions with the luminaire set to continuous full output it is possible that a small percentage of LEDs may require replacement sooner. The Philips Selecon three-year limited warranty includes our guarantee against premature failure of the LED engine.

The PLFRESNEL1 luminaire uses the same proven LED engine as the Philips Selecon PL3, PL1, PLCYC1, PLPROFILE1 and the Philips Vari-Lite VLX luminaires meaning the color experience is simplified across the stage.

Selecon LED Fixtures

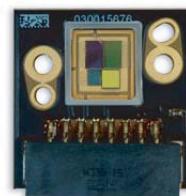

PLFRESNEL1 Luminaire Advanced Control

- ① LCD Menu Display
- ② Local controls offer the ability to access preset color temperatures; locally stored custom presets adjust intensity; colors and motorized focus.

Fixture Voltage: 120

Fixture: FRAMING SPOTLIGHT (LED)

Load Type: DMX

Catalog #: PLZS1-1834-03 + 15ACGH

Mounting: SURFACE

Lamp Spec: LED, 2000 lm

Product Specification Sheet

PLPROFILE1

The PLPROFILE1 is a variable beam profile with precise beam control and pattern projection from a high output beam. An innovative combination of LED source technology and precision optical design, the PLPROFILE1 delivers Philips Selecon's industry benchmark projection quality in a compact, robust luminaire.

The PLPROFILE1 uses the same proven LED engine as the Philips Selecon PL3, PL1, PLCYC1, PLFRESNEL1 and the Philips Vari-Lite VLX ranges meaning colour matching is simplified across the stage. The user interface is the same ensuring ease of use.

A key benefit of the PLPROFILE1 is that it is no longer necessary to change lamps or colour filter. Combining the superior control and light quality of a Philips Selecon Profile with seamless fading between colours allows designers a new level of creativity. Less power consumption and no dimmer circuits makes the PLPROFILE1 the obvious choice for pattern projection and stage washes.

Features

Single source RGBW LED chip delivers limitless colour mixing and variable colour temperature.

Available in 18-34 or 24-44 beam angles.

Interchangeable lens tray between medium and wide versions.

Slot provided for iris, M size pattern holder, or third party effect accessory.

Homogenised fully mixed light, no multiple colour shadows.

Quick selection of colour pre-sets.

No need for lamp replacement or filter maintenance.

No need for dimmers, connect directly to mains supply.

PowerCon In/Out Power connectors.

DMX512 Input/Output with 8 or 16-bit resolution.

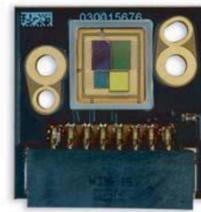

Onboard LCD Menu for ease of addressing/setup.

Fitted with rated safety cable.

PLPROFILE1 LED Engine

The PLPROFILE1's powerful long-life LED engine offers exceptional performance and life.

The Philips Selecon three-year limited warranty includes our guarantee against premature failure of the LED engine.

Approvals

Designed to comply fully with CE standards.

Electrical Specifications

Voltage: 100 – 240 VAC

Wattage: 150W Max. (RGBW @100%)

DROP IN IRIS

Manufacturer: CITY THEATRICAL

Fixture Line: DROP-IN IRISES

Fixture: SELECON PACIFIC IRIS

Catalog #: 2187

Mounting: F21 FIXTURE

Lamp Spec: N/A

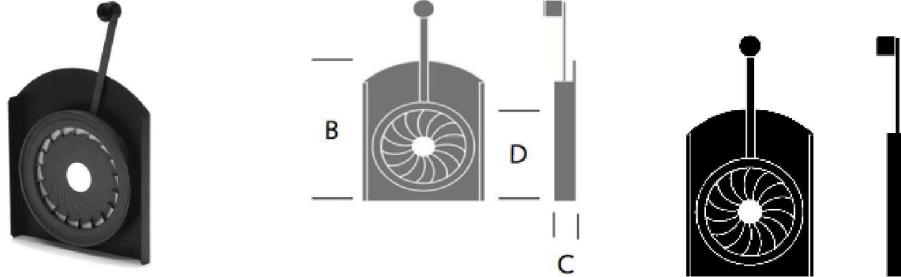

Drop-In Irises

A **Drop-In Iris** is the simple way of changing the beam size of a fixed focus ellipsoidal reflector spotlight. Just drop in an Iris, adjust the handle to change the beam size from fully open to nearly fully closed. We have Irises to fit a variety of popular lighting fixtures.

CTI provides a limited lifetime warranty on all of its manual drop in irises.

Features

Offers precise, smooth control of beam size

- Specially made leaves are tempered and heat resistant to over 1000°F (538°C)
- Fits easily into most standard theatrical ellipsoidals

LUMEN MAINTENANCE

Designed to last with cool running mid-power LEDs projected to maintain 90% (L₉₀) of their initial output for 100,000 hours (at HO), and L₇₀ exceeding 150,000 hours.

LED SYSTEM LED modules and drivers are field replaceable.

PROG (optional) Programmable light output. Specify desired lumens or watts per linear foot. Min: 2.5 w/ft, consult factory for requests above 12 w/ft.

BINNING Standard binning (all Prudential LED boards) includes testing at the chip level and board integration to provide consistent color temperature within a 3-step MacAdam ellipse, with +/- 5% lumen output range and +/- .004 Duv.

PRUBIN™ (OPTIONAL) Prudential Ltg's exclusive 'job binning' method that ensures color temperature consistency across all luminaires on a project. Meticulously testing and labeling EVERY LED BOARD to +/- 25 lumens, +/- 50k CCT and +/- .004 Duv — while also separating positive from negative — allows us to match color, hue and intensity throughout a project and provides a consistent color temperature within a 2-step MacAdam ellipse.

LABELS

ETL damp labeled and I.B.E.W. manufactured

ELECTRICAL

Must specify LED dimming controls. LED fixtures have constant current driver(s) with less than 20% THD when loaded to a minimum of 60%. Drivers sink a maximum of 6mA per driver. DM10 LED drivers are 0-10V dimmable and are compatible with most 0-10V wall slide dimmers and direct 0-10V analog signal dimmers. Max driver size 1.65" w x 1.25" h.

CONSTRUCTION

Housing Die-formed 22-gauge steel, >20% PC recycled, 100% recyclable

End Caps Spring-fastened aluminum, >25% PC recycled, 100% recyclable

Lens Single-piece (up to 8' lengths) extruded acrylic, 100% recyclable

MOUNTING Surface mounted to walls or ceilings or suspended by cable

WEIGHT 2 lbs/ft

WARRANTY Single-source, 5 year limited warranty covers standard components and construction

LUMEN MAINTENANCE

Designed to last with cool running mid-power LEDs projected to maintain 90% (L₉₀) of their initial output for 100,000 hours (at HO), and L₇₀ exceeding 150,000 hours.

LED SYSTEM LED modules and drivers are field replaceable.

PROG (optional) Programmable light output. Specify desired lumens or watts per linear foot. Min: 2.5 w/ft, consult factory for requests above 12 w/ft.

BINNING Standard binning (all Prudential LED boards) includes testing at the chip level and board integration to provide consistent color temperature within a 3-step MacAdam ellipse, with +/- 5% lumen output range and +/- .004 Duv.

PRUBIN™ (OPTIONAL) Prudential Ltg's exclusive 'job binning' method that ensures color temperature consistency across all luminaires on a project. Meticulously testing and labeling EVERY LED BOARD to +/- 25 lumens, +/- 50k CCT and +/- .004 Duv — while also separating positive from negative — allows us to match color, hue and intensity throughout a project and provides a consistent color temperature within a 2-step MacAdam ellipse.

LABELS

ETL damp labeled and I.B.E.W. manufactured

ELECTRICAL

Must specify LED dimming controls. LED fixtures have constant current driver(s) with less than 20% THD when loaded to a minimum of 60%. Drivers sink a maximum of 6mA per driver. DM10 LED drivers are 0-10V dimmable and are compatible with most 0-10V wall slide dimmers and direct 0-10V analog signal dimmers. Max driver size 1.65" w x 1.25" h.

CONSTRUCTION

Housing Die-formed 22-gauge steel, >20% PC recycled, 100% recyclable

End Caps Spring-fastened aluminum, >25% PC recycled, 100% recyclable

Lens Single-piece (up to 8' lengths) extruded acrylic, 100% recyclable

MOUNTING Surface mounted to walls or ceilings or suspended by cable

WEIGHT 2 lbs/ft

WARRANTY Single-source, 5 year limited warranty covers standard components and construction

Prudential Ltg. reserves the right to change design specifications or materials without notice. Please visit www.prulite.com for most current data.

Back-Check No. 2

Jan 15, 2016

Fixture Type:**F23.A****LINEA® 1.5" INDIRECT****LINEAR INDIRECT LED****APPLICATIONS:**

Commercial and retail indirect ambient lighting

CONSTRUCTION:

One piece extruded aluminum housing
 Internal components are die-formed galvanized and cold-rolled steel
 Individual housing lengths are 47 3/4" or 95 1/4"
 Consult factory for continuous rows
 High reflectance white finish. For other finishes, consult factory

OPTICS:

Custom engineered batwing uplight optic

Watts	Lumens
5w/ft	485 lm/ft
10w/ft	843 lm/ft

Die-formed high reflectance white enamel reflector

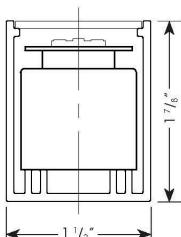

ELECTRICAL:

Electronic, multi-volt (120v-277v) constant current driver
 0-10v dimming standard

This product complies with IEEE C62.41 for surge endurance up to 3KV. Amerlux® recommends using additional surge protection with this unit (supplied by others), surge damage is not covered by warranty.
 Emergency circuit via remote inverter or auxiliary emergency power supply (by others)

MOUNTING:

Aircraft cable suspension
 Fixtures may be continuously row-mounted or configured in a pattern, consult factory

LABELING:**LIN1.5-I**
LED**PROJECT:****TYPE:**Electrostatic sensitive device,
observe precautions for handling**ELECTRICAL**

TRUGROOVE CONTINUOUS

Performance LED

Modules & Runs

Tr.Groove Continuous LED nominal housing lengths

2ft, 3ft, 4ft, 8ft & incremental units.

Standard units allow runs specifiable from 2ft in 1ft steps.

Incremental units allow run lengths from 3ft in increments as small as 1/8in*.

*Note: Asymmetric and Elumen package versions (3000lm/4ft) are only available in 2ft increments.

Recess lens versions can only be installed in the ceiling (not in wall).

To ensure full cavity closure and simplify installation, there are both end-run units with one closed end and mid-run, open units.

Refer to module size details below for actual dimensions e.g. trim, T-grid units fit within a standard 2' grid.

To specify corners and patterns, refer to Tr.Groove Corners data sheets.

Continuous Run Example

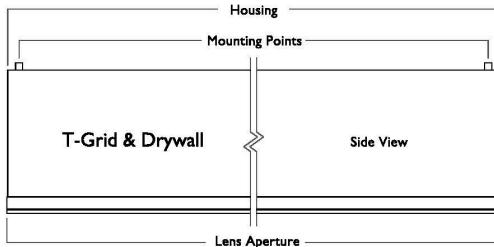

4 ft End	8 ft Mid	2 ft End
14 ft Run		

Housing lengths

Trim type	Run & housing	Lens aperture	Mounting points	Overall trim
T-Grid	Length L	L - 1"		L - 0.2"
Drywall Trimless	Length L	L	L - 0.8"	L + 3.3"
Drywall Trim	Length L	L	L - 0.8"	L + 1.5"

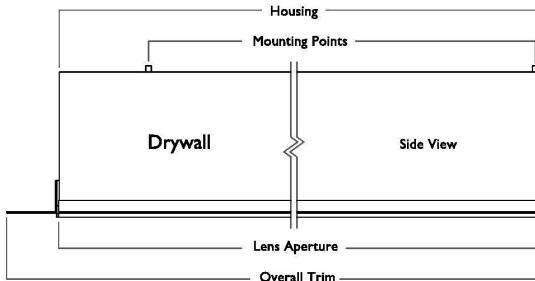

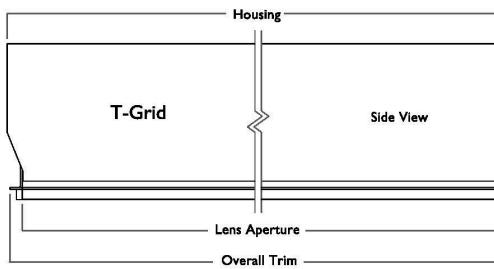

Module Dimensions

Continuous mid-run units

Nominal length	Housing & aperture	Mounting points
2ft	24.0"/610mm	23.2"/590mm
3ft	36.0"/914mm	35.2"/894mm
4ft	48.0"/1219mm	47.2"/1199mm
8ft	96.0"/2438mm	95.2"/2418mm
Increment	Length L	L - 0.8"

Continuous end-run units

Nominal length	Housing	Lens aperture	Trim - T-Grid
2ft	24.0"/610mm	23.5"/597mm	23.9"/606mm
3ft	36.0"/914mm	35.5"/902mm	35.9"/911mm

* Compatible with TechZone® 4" Ceiling Grid

Trim Views

Regressed lens

Drywall Trimless

Drywall Trim

T-grid

Housing

Die-formed 20 gauge cold-rolled steel. Multiple upper wire entrances available for continuous row mounting of fixtures.

Weight

Maximum 3.5lb/ft.

Optical System

Performance version: White light emitted from the LED sources is internally reflected and laterally redirected by a biconvex lens. Light is then reflected by Miro Silver panels and exits through the optical lens assembly. This assembly contains acrylic extrusion profiles to retain a layer of MesoOptics film, creating both an uninterrupted continuum of light and an optical batwing distribution.

Definition version: Light passes through a diffuse white acrylic lens to deliver a highly uniform luminous continuum.

Standard Driver

Dimming 0-10V, 5-100%. Output is Class 2 rated.

Lumen Maintenance

At an ambient temperature of 25°C in non-insulated contact applications, the LED lumen maintenance expectation for each lumen package is:

K L₈₀ (12k) 71,000 hrs
G L₈₀ (12k) 68,000 hrs
E L₈₀ (12k) 54,000 hrs

Mounting

Mounting brackets on housing sides support T-Grid installation. 1/16" diameter aircraft cable with self-locking tamper-resistant, miniature cable gripper provides vertical adjustment for drywall. Aircraft cable, crimp and gripper independently tested to meet stringent safety requirements.

Compatible with 4" Armstrong TechZone ceiling grid.

Joints

Self-aligning joining system with hands-free pre-joining wire access.

Electrical

Factory pre-wired to section ends with quick-wire connectors.

Approvals

Certified to UL, CSA and IES standards. Insulation Contact (IC) rated.

Finish

Extruded aluminum trim and die-cast endplates coated with electrostatically applied and thermally cured polyester powder coat paint finish.

Environment

Rated for dry or damp locations in operating ambient temperatures 0-40°C (32-104°F). Certain luminaire components may be adversely affected by contaminants. Damage caused by sulfur, chlorine, petroleum based solutions or other contaminants are not covered under warranty.

Due to continuing product improvements, Philips LedaLite reserves the right to change the specifications without notice.

Trim Views

Regressed lens

Drywall Trimless

Drywall Trim

T-grid

Housing

Die-formed 20 gauge cold-rolled steel. Multiple upper wire entrances available for continuous row mounting of fixtures.

Weight

Maximum 3.5lb/ft.

Optical System

Performance version: White light emitted from the LED sources is internally reflected and laterally redirected by a biconvex lens. Light is then reflected by Miro Silver panels and exits through the optical lens assembly. This assembly contains acrylic extrusion profiles to retain a layer of MesoOptics film, creating both an uninterrupted continuum of light and an optical batwing distribution.

Definition version: Light passes through a diffuse white acrylic lens to deliver a highly uniform luminous continuum.

Standard Driver

Dimming 0-10V, 5-100%. Output is Class 2 rated.

Lumen Maintenance

At an ambient temperature of 25°C in non-insulated contact applications, the LED lumen maintenance expectation for each lumen package is:

- K L₈₀ (12k) 71,000 hrs
- G L₈₀ (12k) 68,000 hrs
- E L₈₀ (12k) 54,000 hrs

Mounting

Mounting brackets on housing sides support T-Grid installation. 1/16" diameter aircraft cable with self-locking tamper-resistant, miniature cable gripper provides vertical adjustment for drywall. Aircraft cable, crimp and gripper independently tested to meet stringent safety requirements.

Compatible with 4" Armstrong TechZone ceiling grid.

Joints

Self-aligning joining system with hands-free pre-joining wire access.

Electrical

Factory pre-wired to section ends with quick-wire connectors.

Approvals

Certified to UL, CSA and IES standards. Insulation Contact (IC) rated.

Finish

Extruded aluminum trim and die-cast endplates coated with electrostatically applied and thermally cured polyester powder coat paint finish.

Environment

Rated for dry or damp locations in operating ambient temperatures 0-40°C (32-104°F). Certain luminaire components may be adversely affected by contaminants. Damage caused by sulfur, chlorine, petroleum based solutions or other contaminants are not covered under warranty.

Due to continuing product improvements, Philips LedaLite reserves the right to change the specifications without notice.

TRUGROOVE CONTINUOUS

Performance LED

Modules & Runs

Tr.Groove Continuous LED nominal housing lengths

2ft, 3ft, 4ft, 8ft & incremental units.

Standard units allow runs specifiable from 2ft in 1ft steps.

Incremental units allow run lengths from 3ft in increments as small as 1/8in*.

*Note: Asymmetric and Elumen package versions (3000lm/4ft) are only available in 2ft increments.

Recess lens versions can only be installed in the ceiling (not in wall).

To ensure full cavity closure and simplify installation, there are both end-run units with one closed end and mid-run, open units.

Refer to module size details below for actual dimensions e.g. trim. T-grid units fit within a standard 2' grid.

To specify corners and patterns, refer to Tr.Groove Corners data sheets.

Optical System

Performance version: White light emitted from the LED sources is internally reflected and laterally redirected by a biconvex lens. Light is then reflected by Miro Silver panels and exits through the optical lens assembly. This assembly contains acrylic extrusion profiles to retain a layer of MesoOptics film, creating both an uninterrupted continuum of light and an optical batwing distribution.

Definition version: Light passes through a diffuse white acrylic lens to deliver a highly uniform luminous continuum.

Standard Driver

Dimming 0-10V, 5-100%. Output is Class 2 rated.

Lumen Maintenance

At an ambient temperature of 25°C in non-insulated contact applications, the LED lumen maintenance expectation for each lumen package is:

K L₈₀ (12k) 71,000 hrs

G L₈₀ (12k) 68,000 hrs

E L₈₀ (12k) 54,000 hrs

Mounting

Mounting brackets on housing sides support T-Grid installation. 1/16" diameter aircraft cable with self-locking tamper-resistant, miniature cable gripper provides vertical adjustment for drywall. Aircraft cable, crimp and gripper independently tested to meet stringent safety requirements.

Compatible with 4" Armstrong TechZone ceiling grid.

Joints

Self-aligning joining system with hands-free pre-joining wire access.

Electrical

Factory pre-wired to section ends with quick-wire connectors.

Approvals

Certified to UL, CSA and IES standards. Insulation Contact (IC) rated.

Finish

Extruded aluminum trim and die-cast endplates coated with electrostatically applied and thermally cured polyester powder coat paint finish.

Environment

Rated for dry or damp locations in operating ambient temperatures 0-40°C (32-104°F). Certain luminaire components may be adversely affected by contaminants. Damage caused by sulfur, chlorine, petroleum based solutions or other contaminants are not covered under warranty.

Due to continuing product improvements, Philips LedaLite reserves the right to change the specifications without notice.

TRUGROOVE CONTINUOUS

Performance LED

Modules & Runs

Tr.Groove Continuous LED nominal housing lengths

2ft, 3ft, 4ft, 8ft & incremental units.

Standard units allow runs specifiable from 2ft in 1ft steps.

Incremental units allow run lengths from 3ft in increments as small as 1/8in*.

*Note: Asymmetric and Elumen package versions (3000lm/4ft) are only available in 2ft increments.

Recess lens versions can only be installed in the ceiling (not in wall).

To ensure full cavity closure and simplify installation, there are both end-run units with one closed end and mid-run, open units.

Refer to module size details below for actual dimensions e.g. trim. T-grid units fit within a standard 2' grid.

To specify corners and patterns, refer to Tr.Groove Corners data sheets.

Continuous Run Example

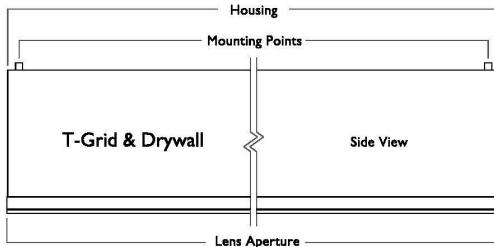

4 ft End	8 ft Mid	2 ft End

TRUGROOVE CONTINUOUS

Performance LED

Modules & Runs

Tr.Groove Continuous LED nominal housing lengths

2ft, 3ft, 4ft, 8ft & incremental units.

Standard units allow runs specifiable from 2ft in 1ft steps.

Incremental units allow run lengths from 3ft in increments as small as 1/8in*.

*Note: Asymmetric and Elumen package versions (3000lm/4ft) are only available in 2ft increments.

Recess lens versions can only be installed in the ceiling (not in wall).

To ensure full cavity closure and simplify installation, there are both end-run units with one closed end and mid-run, open units.

Refer to module size details below for actual dimensions e.g. trim. T-grid units fit within a standard 2' grid.

To specify corners and patterns, refer to Tr.Groove Corners data sheets.

Continuous Run Example

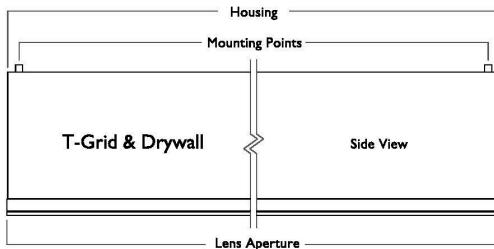

4 ft End	8 ft Mid	2 ft End
14 ft Run		

Housing lengths

Trim type	Run & housing	Lens aperture	Mounting points	Overall trim
T-Grid	Length L	L - 1"		L - 0.2"
Drywall Trimless	Length L	L	L - 0.8"	L + 3.3"
Drywall Trim	Length L	L	L - 0.8"	L + 1.5"

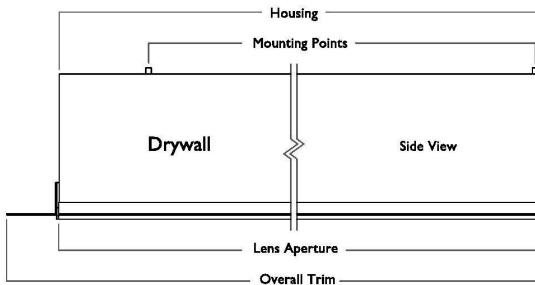

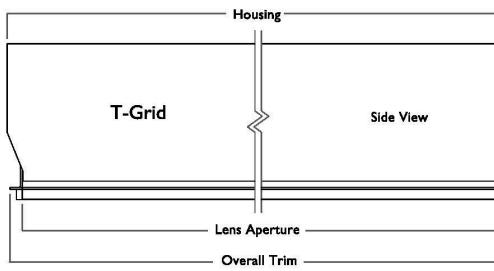

Module Dimensions

Continuous mid-run units

Nominal length	Housing & aperture	Mounting points
2ft	24.0"/610mm	23.2"/590mm
3ft	36.0"/914mm	35.2"/894mm

Tegular 15/16"

* Compatible with TechZone® 4" Ceiling Grid

Trim Views

Regressed lens

Drywall Trimless

Drywall Trim

T-grid

Housing

Die-formed 20 gauge cold-rolled steel. Multiple upper wire entrances available for continuous row mounting of fixtures.

Weight

Maximum 3.5lb/ft.

Optical System

Performance version: White light emitted from the LED sources is internally reflected and laterally redirected by a biconvex lens. Light is then reflected by Miro Silver panels and exits through the optical lens assembly. This assembly contains acrylic extrusion profiles to retain a layer of MesoOptics film, creating both an uninterrupted continuum of light and an optical batwing distribution.

Definition version: Light passes through a diffuse white acrylic lens to deliver a highly uniform luminous continuum.

Standard Driver

Dimming 0-10V, 5-100%. Output is Class 2 rated.

Lumen Maintenance

At an ambient temperature of 25°C in non-insulated contact applications, the LED lumen maintenance expectation for each lumen package is:

- K L₈₀ (12k) 71,000 hrs
- G L₈₀ (12k) 68,000 hrs
- E L₈₀ (12k) 54,000 hrs

Mounting

Mounting brackets on housing sides support T-Grid installation. 1/16" diameter aircraft cable with self-locking tamper-resistant, miniature cable gripper provides vertical adjustment for drywall. Aircraft cable, crimp and gripper independently tested to meet stringent safety requirements.

Compatible with 4" Armstrong TechZone ceiling grid.

Joints

Self-aligning joining system with hands-free pre-joining wire access.

Electrical

Factory pre-wired to section ends with quick-wire connectors.

Approvals

Certified to UL, CSA and IES standards. Insulation Contact (IC) rated.

Finish

Extruded aluminum trim and die-cast endplates coated with electrostatically applied and thermally cured polyester powder coat paint finish.

Environment

Rated for dry or damp locations in operating ambient temperatures 0-40°C (32-104°F). Certain luminaire components may be adversely affected by contaminants. Damage caused by sulfur, chlorine, petroleum based solutions or other contaminants are not covered under warranty.

Due to continuing product improvements, Philips LedaLite reserves the right to change the specifications without notice.

TRUGROOVE CONTINUOUS

Performance LED

Modules & Runs

Tr.Groove Continuous LED nominal housing lengths

2ft, 3ft, 4ft, 8ft & incremental units.

Standard units allow runs specifiable from 2ft in 1ft steps.

Incremental units allow run lengths from 3ft in increments as small as 1/8in*.

*Note: Asymmetric and Elumen package versions (3000lm/4ft) are only available in 2ft increments.

Recess lens versions can only be installed in the ceiling (not in wall).

To ensure full cavity closure and simplify installation, there are both end-run units with one closed end and mid-run, open units.

Refer to module size details below for actual dimensions e.g. trim. T-grid units fit within a standard 2' grid.

To specify corners and patterns, refer to Tr.Groove Corners data sheets.

Continuous Run Example

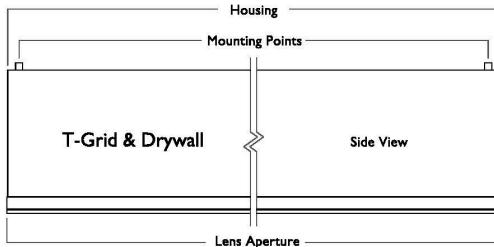

4 ft End	8 ft Mid	2 ft End
14 ft Run		

Housing lengths

Trim type	Run & housing	Lens aperture	Mounting points	Overall trim
T-Grid	Length L	L - 1"		L - 0.2"
Drywall Trimless	Length L	L	L - 0.8"	L + 3.3"
Drywall Trim	Length L	L	L - 0.8"	L + 1.5"

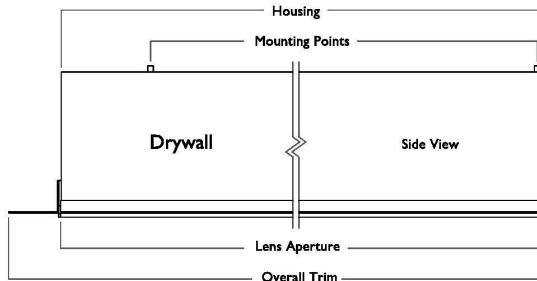

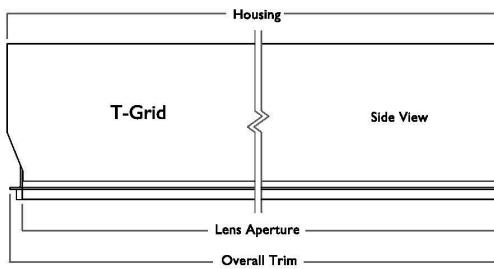

Module Dimensions

Continuous mid-run units

Nominal length	Housing & aperture	Mounting points
2ft	24.0"/610mm	23.2"/590 mm
3ft	36.0"/914mm	35.2"/894 mm
4ft	48.0"/1219mm	47.2"/1199 mm
8ft	96.0"/2438mm	95.2"/2418 mm
Increment	Length L	L - 0.8"

Continuous end-run units

Trim Views

Regressed lens

Drywall Trimless

Drywall Trim

T-grid

Housing

Die-formed 20 gauge cold-rolled steel. Multiple upper wire entrances available for continuous row mounting of fixtures.

Weight

Maximum 3.5lb/ft.

Optical System

Performance version: White light emitted from the LED sources is internally reflected and laterally redirected by a biconvex lens. Light is then reflected by Miro Silver panels and exits through the optical lens assembly. This assembly contains acrylic extrusion profiles to retain a layer of MesoOptics film, creating both an uninterrupted continuum of light and an optical batwing distribution.

Definition version: Light passes through a diffuse white acrylic lens to deliver a highly uniform luminous continuum.

Standard Driver

Dimming 0-10V, 5-100%. Output is Class 2 rated.

Lumen Maintenance

At an ambient temperature of 25°C in non-insulated contact applications, the LED lumen maintenance expectation for each lumen package is:

K L₈₀ (12k) 71,000 hrs
G L₈₀ (12k) 68,000 hrs
E L₈₀ (12k) 54,000 hrs

Mounting

Mounting brackets on housing sides support T-Grid installation. 1/16" diameter aircraft cable with self-locking tamper-resistant, miniature cable gripper provides vertical adjustment for drywall. Aircraft cable, crimp and gripper independently tested to meet stringent safety requirements.

Compatible with 4" Armstrong TechZone ceiling grid.

Joints

Self-aligning joining system with hands-free pre-joining wire access.

Electrical

Factory pre-wired to section ends with quick-wire connectors.

Approvals

Certified to UL, CSA and IES standards. Insulation Contact (IC) rated.

Finish

Extruded aluminum trim and die-cast endplates coated with electrostatically applied and thermally cured polyester powder coat paint finish.

Environment

Rated for dry or damp locations in operating ambient temperatures 0-40°C (32-104°F). Certain luminaire components may be adversely affected by contaminants. Damage caused by sulfur, chlorine, petroleum based solutions or other contaminants are not covered under warranty.

Due to continuing product improvements, Philips LedaLite reserves the right to change the specifications without notice.

Available Light Platforms

Available Mounting

D5 | accolade⁵**Linear Dimensions:**

Standard lengths available are located on the 'elements' spec sheet. All other lengths should be specified as follows...

Nominal Damp Location Row

R___: Specify in nominal feet.

Choose when nominal length is acceptable.

Actual length will be shorter or longer due to metric lamp lengths. Lengths over 12' are comprised of multiple sections.

Examples: a nominal 54ft row begins as D5R54; a 7ft individual as D5R7.

Nominal Wet Location Run

G___: Specify in nominal feet.

Choose when nominal length is acceptable and wet location is necessary.

Actual length will be shorter or longer due to metric lamp lengths. Lengths over 12' are comprised of multiple sections with minimal endcaps, joined via wet rated connectors (by others).

Examples: a nominal 54ft row begins as D5G54; a 7ft individual as D5G7.

Exact Row

M___: Specify overall length in inches to the nearest hundredth.

Choose when exact lengths are required as determined by space constraints, etc. Submittals required. Lengths over 12' are comprised of multiple sections.

Examples: an exact 54ft row begins as D5M648.00; a 7ft individual as D5M84.00.

Pattern Dimensions:

Each pattern contains a precision-formed optical platform engineered for maximum light output and even distribution.

Pattern

Specify overall length of each section in inches to the nearest hundredth.

Choose when multiple angles are necessary. Submittals required: contact our design-assist team and submit architectural drawings with precise lengths. 90° angles are assumed unless otherwise specified. LED + WISP™ + HTLO™ lens is recommended for patterns.

"L" patterns have 2 legs.

"U" patterns have 3 legs.

"R" patterns have 2 legs of equal size (4 legs total) or 1 leg total if exact square. All recessed patterns may be configured on a flat plane. "L"s" and "U"s" may be configured as overhead or perimeter with inside corners assumed unless otherwise specified. See nomenclature section for specification examples.

Lamping:

LED: 5yr warranty. >60,000hr LED life. Tested to LM-79 and LM-80. See wattage/lumen table for specifications per foot. All specifications are subject to change.

T5/T5HO. Single or dual lamps in cross section or staggered single lamping.

Low-profile electronic, high power factor, program start, sound rating A, inherent thermal protection, UL listed Class P, <10% THD. Dimming: specify manufacturer/model.

T8. Single lamp in cross section. Low-profile electronic, choose low, standard or high power factor, instant start, sound rating A, inherent thermal protection, UL listed Class P, <10% THD. Specify if program start or custom ballast factor required. Dimming: specify manufacturer/model.

MR16 Modules. Standard MR16 modules are 6" each. Sizing for modules in exact row lengths is determined by factory. Submittal drawings may be required. Use encapsulated 20w or 35w aluminized reflector or 20w or 37w IR MR16 lamps only (not included). See MR16 Addendum for lamp recommendations.

**Legend:**

1. Emergency ballast not applicable on lengths 3ft or less.
2. Multi-circuiting: submit multi-circuiting requirements during submittal process.
3. Standard on/off occupancy sensor: Wattstopper FS-205 with minimal 1" diameter.
4. Standard occupancy sensor with photocell: Wattstopper FS-205 wired for daylight harvesting. Requires 0-10V dimming ballast.
5. Lens is required for use in wet or natatorium locations.
6. T5/T5HO only, 1 lamp in cross section.
7. Fluorescent only. Staggered lamping not recommended with HTLO™.
8. LED only. "SH" optics recommended.

Mounting:

Flush gyp/hard ceiling or wall. "Flangeless" appearance for gyp or other hard ceiling/wall. Flange is not visible and is not factory-painted. Raw aluminum flange must be attached to blocking (by others), mudded over and painted by ceiling contractor for flangeless appearance.

Regressed flush gyp/hard ceiling or wall. Same as above except flange raises lens up into ceiling. "RG" is 1" regressed resulting in a 4.5" height. Interior 1" regressed portion is exposed raw aluminum and visible unless finish is chosen. Contractor should apply ceiling paint if finish is not chosen.

Trim Flange. 1/2" visible powdercoated flange. Use for any gyp or hard ceiling/wall that requires a minimal flange covering the ceiling cut-out edge. Choose finish color for trim flange.

T-Bar. Standard T-Bar/Grid Ceiling: 9/16" or 15/16" standard T-Bar or 9/16" slot ceiling. Raw aluminum flange sits on T-Bar, is not visible and is not painted. LED & T5 lamping available for all lengths; T8 available only in 4ft increments.

4" Armstrong Techzone™ / USG Logix™ or other 4" Utility Systems: Suitable for use in 4" on-center standard or slot T-Bar systems. Raw aluminum flange sits on T-Bar, is not visible and is not painted. The N4 option requires that the housing sit on top of the slot, creating a slightly recessed fixture. The T4 fixture will sit flush to ceiling.

Concealed Grid for Decoustic Ceilencio®: 2-3/4" panel/grid regress. Raw aluminum flange sits on T-Bar, is not visible and is not painted. LED & T5 only.

Shadowmold. Dual-flanged housing creates a 5/8" shadowed gap along wall/surface with choice of ceiling flange on opposite side for perimeter mounting. Gyp: LED, T5 or T8; T-Bar: LED or T5. Shadowmold spacer is painted black. Exposed side of housing next to wall is unpainted - housing may be field-painted if necessary.

"RG5": is intended only for perimeter mounting in gyp ceiling. The 5" regressed gyp flange on one side, with shadowmolding on the opposite side, results in a 8.5" overall height. Interior 5" regressed portion is exposed raw aluminum and visible unless finish is chosen. Contractor should apply ceiling paint if finish is not chosen.

Finish:

Electrostatically applied powder coat finish.

Construction:

60% recycled aluminum extruded housing. Steel endcaps with earthquake suspension cable attachment holes. Optional MRI housing configuration is specially built with all non-ferrous materials.

Listing:

UL/CUL. Damp or Wet Location.

Companion Luminaires:

D1 suspended, D2 suspended/wall, D3 suspended/ceiling/wall, D4 wall, D6 recessed.

9. MR16 modules. Each module adds 8" total to luminaire length. Indicate quantity and location within row. Submittals may be required.
10. Not available with staggered or dual lamping.
11. Staggered lamping not available on lengths less than 8ft. 8ft length uses 3-3ft lamps. 12ft uses 2-3ft and 2-4ft lamps.
12. Not available with LED.
13. The N4 mounting requires the housing to sit on top of the slot T-Bar creating a slight regress and will not sit flush to ceiling tile.

D5 | accolade⁵**Linear Dimensions:**

Standard lengths available are located on the 'elements' spec sheet. All other lengths should be specified as follows...

Nominal Damp Location Row

R___: Specify in nominal feet.

Choose when nominal length is acceptable.

Actual length will be shorter or longer due to metric lamp lengths. Lengths over 12' are comprised of multiple sections.

Examples: a nominal 54ft row begins as D5R54; a 7ft individual as D5R7.

Nominal Wet Location Run

G___: Specify in nominal feet.

Choose when nominal length is acceptable and wet location is necessary.

Actual length will be shorter or longer due to metric lamp lengths. Lengths over 12' are comprised of multiple sections with minimal endcaps, joined via wet rated connectors (by others).

Examples: a nominal 54ft row begins as D5G54; a 7ft individual as D5G7.

Exact Row

M___: Specify overall length in inches to the nearest hundredth.

Choose when exact lengths are required as determined by space constraints, etc. Submittals required. Lengths over 12' are comprised of multiple sections.

Examples: an exact 54ft row begins as D5M648.00; a 7ft individual as D5M84.00.

Pattern Dimensions:

Each pattern contains a precision-formed optical platform engineered for maximum light output and even distribution.

Pattern

Specify overall length of each section in inches to the nearest hundredth.

Choose when multiple angles are necessary. Submittals required: contact our design-assist team and submit architectural drawings with precise lengths. 90° angles are assumed unless otherwise specified. LED + WISP™ + HTLO™ lens is recommended for patterns.

"L" patterns have 2 legs.

"U" patterns have 3 legs.

"R" patterns have 2 legs of equal size (4 legs total) or 1 leg total if exact square. All recessed patterns may be configured on a flat plane. "L"s" and "U"s" may be configured as overhead or perimeter with inside corners assumed unless otherwise specified. See nomenclature section for specification examples.

Lamping:

LED: 5yr warranty. >60,000hr LED life. Tested to LM-79 and LM-80. See wattage/lumen table for specifications per foot. All specifications are subject to change.

T5/T5HO. Single or dual lamps in cross section or staggered single lamping. Low-profile electronic, high power factor, program start, sound rating A, inherent thermal protection, UL listed Class P, <10% THD. Dimming: specify manufacturer/model.

T8. Single lamp in cross section. Low-profile electronic, choose low, standard or high power factor, instant start, sound rating A, inherent thermal protection, UL listed Class P, <10% THD. Specify if program start or custom ballast factor required. Dimming: specify manufacturer/model.

MR16 Modules. Standard MR16 modules are 6" each. Sizing for modules in exact row lengths is determined by factory. Submittal drawings may be required. Use encapsulated 20w or 35w aluminized reflector or 20w or 37w IR MR16 lamps only (not included). See *MR16 Addendum* for lamp recommendations.

Legend:

1. Emergency ballast not applicable on lengths 3ft or less.
2. Multi-circuiting: submit multi-circuiting requirements during submittal process.
3. Standard on/off occupancy sensor: Wattstopper FS-205 with minimal 1" diameter.
4. Standard occupancy sensor with photocell: Wattstopper FS-205 wired for daylight harvesting. Requires 0-10V dimming ballast.
5. Lens is required for use in wet or natatorium locations.
6. T5/T5HO only, 1 lamp in cross section.
7. Fluorescent only. Staggered lamping not recommended with HTLO™.
8. LED only. "SH" optics recommended.

Mounting:

Flush gyp/hard ceiling or wall. "Flangeless" appearance for gyp or other hard ceiling/wall. Flange is not visible and is not factory-painted. Raw aluminum flange must be attached to blocking (by others), mudded over and painted by ceiling contractor for flangeless appearance.

Regressed flush gyp/hard ceiling or wall. Same as above except flange raises lens up into ceiling. "RG" is 1" regressed resulting in a 4.5" height. Interior 1" regressed portion is exposed raw aluminum and visible unless finish is chosen. Contractor should apply ceiling paint if finish is not chosen.

Trim Flange. 1/2" visible powdercoated flange. Use for any gyp or hard ceiling/wall that requires a minimal flange covering the ceiling cut-out edge. Choose finish color for trim flange.

T-Bar. Standard T-Bar/Grid Ceiling: 9/16" or 15/16" standard T-Bar or 9/16" slot ceiling. Raw aluminum flange sits on T-Bar, is not visible and is not painted. LED & T5 lamping available for all lengths; T8 available only in 4ft increments.

4" Armstrong Techzone™ / USG Logix™ or other 4" Utility Systems: Suitable for use in 4" on-center standard or slot T-Bar systems. Raw aluminum flange sits on T-Bar, is not visible and is not painted. The N4 option requires that the housing sit on top of the slot, creating a slightly recessed fixture. The T4 fixture will sit flush to ceiling.

Concealed Grid for Decoustic Ceilencio®: 2-3/4" panel/grid regress. Raw aluminum flange sits on T-Bar, is not visible and is not painted. LED & T5 only.

Shadowmold. Dual-flanged housing creates a 5/8" shadowed gap along wall/surface with choice of ceiling flange on opposite side for perimeter mounting. Gyp: LED, T5 or T8; T-Bar: LED or T5. Shadowmold spacer is painted black. Exposed side of housing next to wall is unpainted - housing may be field-painted if necessary.

"RG5": is intended only for perimeter mounting in gyp ceiling. The 5" regressed gyp flange on one side, with shadowmolding on the opposite side, results in a 8.5" overall height. Interior 5" regressed portion is exposed raw aluminum and visible unless finish is chosen. Contractor should apply ceiling paint if finish is not chosen.

Finish:

Electrostatically applied powder coat finish.

Construction:

60% recycled aluminum extruded housing. Steel endcaps with earthquake suspension cable attachment holes. Optional MRI housing configuration is specially built with all non-ferrous materials.

Listing:

UL/CUL. Damp or Wet Location.

Companion Luminaires:

D1 suspended, D2 suspended/wall, D3 suspended/ceiling/wall, D4 wall, D6 recessed.

9. MR16 modules. Each module adds 8" total to luminaire length. Indicate quantity and location within row. Submittals may be required.
10. Not available with staggered or dual lamping.
11. Staggered lamping not available on lengths less than 8ft. 8ft length uses 3-3ft lamps. 12ft uses 2-3ft and 2-4ft lamps.
12. Not available with LED.
13. The N4 mounting requires the housing to sit on top of the slot T-Bar creating a slight regress and will not sit flush to ceiling tile.

Examples: a nominal 54ft row begins as D5G54; a 7ft individual as D5G7.

Exact Row

M___: Specify overall length in inches to the nearest hundredth.

Choose when exact lengths are required as determined by space constraints, etc. Submittals required. Lengths over 12' are comprised of multiple sections.

Examples: an exact 54ft row begins as D5M648.00; a 7ft individual as D5M84.00.

Pattern Dimensions:

Each pattern contains a precision-formed optical platform engineered for maximum light output and even distribution.

Pattern

Specify overall length of each section in inches to the nearest hundredth.

Choose when multiple angles are necessary. Submittals required: contact our design-assist team and submit architectural drawings with precise lengths. 90° angles are assumed unless otherwise specified. LED + WISP™ + HTLO™ lens is recommended for patterns.

"L" patterns have 2 legs.

"U" patterns have 3 legs.

"R" patterns have 2 legs of equal size (4 legs total) or 1 leg total if exact square. All recessed patterns may be configured on a flat plane. "L"s" and "U"s" may be configured as overhead or perimeter with inside corners assumed unless otherwise specified. See nomenclature section for specification examples.

Lamping:

LED: 5yr warranty. >60,000hr LED life. Tested to LM-79 and LM-80. See wattage/lumen table for specifications per foot. All specifications are subject to change.

T5/T5HO. Single or dual lamps in cross section or staggered single lamping. Low-profile electronic, high power factor, program start, sound rating A, inherent thermal protection, UL listed Class P, <10% THD. Dimming: specify manufacturer/model.

T8. Single lamp in cross section. Low-profile electronic, choose low, standard or high power factor, instant start, sound rating A, inherent thermal protection, UL listed Class P, <10% THD. Specify if program start or custom ballast factor required. Dimming: specify manufacturer/model.

MR16 Modules. Standard MR16 modules are 6" each. Sizing for modules in exact row lengths is determined by factory. Submittal drawings may be required. Use encapsulated 20w or 35w aluminized reflector or 20w or 37w IR MR16 lamps only (not included). See *MR16 Addendum* for lamp recommendations.

Mounting:

Flush gypsum/hard ceiling or wall. "Flangeless" appearance for gypsum or other hard ceiling/wall. Flange is not visible and is not factory-painted. Raw aluminum flange must be attached to blocking (by others), mudded over and painted by ceiling contractor for flangeless appearance.

Regressed flush gypsum/hard ceiling or wall. Same as above except flange raises lens up into ceiling. "RG" is 1" regressed resulting in a 4.5" height. Interior 1" regressed portion is exposed raw aluminum and visible unless finish is chosen. Contractor should apply ceiling paint if finish is not chosen.

Trim Flange. 1/2" visible powdercoated flange. Use for any gypsum or hard ceiling/wall that requires a minimal flange covering the ceiling cut-out edge. Choose finish color for trim flange.

T-Bar. Standard T-Bar/Grid Ceiling: 9/16" or 15/16" standard T-Bar or 9/16" slot ceiling. Raw aluminum flange sits on T-Bar, is not visible and is not painted. LED & T5 lamping available for all lengths; T8 available only in 4ft increments.

4" Armstrong Techzone™ / USG Logix™ or other 4" Utility Systems: Suitable for use in 4" on-center standard or slot T-Bar systems. Raw aluminum flange sits on T-Bar, is not visible and is not painted. The N4 option requires that the housing sit on top of the slot, creating a slightly recessed fixture. The T4 fixture will sit flush to ceiling.

Concealed Grid for Decoustic Ceilencio®: 2-3/4" panel/grid regress. Raw aluminum flange sits on T-Bar, is not visible and is not painted. LED & T5 only.

Shadowmold. Dual-flanged housing creates a 5/8" shadowed gap along wall/surface with choice of ceiling flange on opposite side for perimeter mounting. Gyp: LED, T5 or T8; T-Bar: LED or T5. Shadowmold spacer is painted black. Exposed side of housing next to wall is unpainted - housing may be field-painted if necessary.

"RG5": is intended only for perimeter mounting in gypsum ceiling. The 5" regressed gypsum flange on one side, with shadowmolding on the opposite side, results in a 8.5" overall height. Interior 5" regressed portion is exposed raw aluminum and visible unless finish is chosen. Contractor should apply ceiling paint if finish is not chosen.

Finish:

Electrostatically applied powder coat finish.

Construction:

60% recycled aluminum extruded housing. Steel endcaps with earthquake suspension cable attachment holes. Optional MRI housing configuration is specially built with all non-ferrous materials.

Listing:

UL/CUL, Damp or Wet Location.

Companion Luminaires:

D1 suspended, D2 suspended/wall, D3 suspended/ceiling/wall, D4 wall, D6 recessed.

Legend:

1. Emergency ballast not applicable on lengths 3ft or less.

2. Multi-circuiting: submit multi-circuiting requirements during submittal process.

3. Standard on/off occupancy sensor: Wattstopper FS-205 with minimal 1" diameter.

4. Standard occupancy sensor with photocell: Wattstopper FS-205 wired for daylight harvesting. Requires 0-10V dimming ballast.

5. Lens is required for use in wet or natatorium locations.

6. T5/T5HO only, 1 lamp in cross section.

7. Fluorescent only. Staggered lamping not recommended with HTLO™.

8. LED only. "SH" optics recommended.

9. MR16 modules. Each module adds 8" total to luminaire length. Indicate quantity and location within row. Submittals may be required.

10. Not available with staggered or dual lamping.

11. Staggered lamping not available on lengths less than 8ft. 8ft length uses 3-3ft lamps. 12ft uses 2-3ft and 2-4ft lamps.

12. Not available with LED.

13. The N4 mounting requires the housing to sit on top of the slot T-Bar creating a slight regress and will not sit flush to ceiling tile.

- L's, U's, squares and rectangles
- tig-welded corners, sanded smooth to eliminate light leaks
- fully lit corners with mitered lenses
- staggered trays eliminate socket shadows
- seamless transitions between sections and various mounting types
- LED recommended for patterns, T5 staggered allowed, T8 n/a

Cross Sections

Multiple configurations available - sampling shown

Available Light Platforms

Available Mounting

D5 | accolade⁵**Linear Dimensions:**

Standard lengths available are located on the 'elements' spec sheet. All other lengths should be specified as follows...

Nominal Damp Location Row

R___: Specify in nominal feet.

Choose when nominal length is acceptable.

Actual length will be shorter or longer due to metric lamp lengths. Lengths over 12' are comprised of multiple sections.

Examples: a nominal 54ft row begins as D5R54; a 7ft individual as D5R7.

Nominal Wet Location Run

G___: Specify in nominal feet.

Choose when nominal length is acceptable and wet location is necessary.

Actual length will be shorter or longer due to metric lamp lengths. Lengths over 12' are comprised of multiple sections with minimal endcaps, joined via wet rated connectors (by others).

Examples: a nominal 54ft row begins as D5G54; a 7ft individual as D5G7.

Exact Row

M___: Specify overall length in inches to the nearest hundredth.

Choose when exact lengths are required as determined by space constraints, etc. Submittals required. Lengths over 12' are comprised of multiple sections.

Examples: an exact 54ft row begins as D5M648.00; a 7ft individual as D5M84.00.

Pattern Dimensions:

Each pattern contains a precision-formed optical platform engineered for maximum light output and even distribution.

Pattern

Specify overall length of each section in inches to the nearest hundredth.

Choose when multiple angles are necessary. Submittals required: contact our design-assist team and submit architectural drawings with precise lengths. 90° angles are assumed unless otherwise specified. LED + WISP™ + HTLO™ lens is recommended for patterns.

"L" patterns have 2 legs.

"U" patterns have 3 legs.

"R" patterns have 2 legs of equal size (4 legs total) or 1 leg total if exact square. All recessed patterns may be configured on a flat plane. "L"s" and "U"s" may be configured as overhead or perimeter with inside corners assumed unless otherwise specified. See nomenclature section for specification examples.

Lamping:

LED: 5yr warranty. >60,000hr LED life. Tested to LM-79 and LM-80. See wattage/lumen table for specifications per foot. All specifications are subject to change.

T5/T5HO. Single or dual lamps in cross section or staggered single lamping.

Low-profile electronic, high power factor, program start, sound rating A, inherent thermal protection, UL listed Class P, <10% THD. Dimming: specify manufacturer/model.

T8. Single lamp in cross section. Low-profile electronic, choose low, standard or high power factor, instant start, sound rating A, inherent thermal protection, UL listed Class P, <10% THD. Specify if program start or custom ballast factor required. Dimming: specify manufacturer/model.

MR16 Modules. Standard MR16 modules are 6" each. Sizing for modules in exact row lengths is determined by factory. Submittal drawings may be required. Use encapsulated 20w or 35w aluminized reflector or 20w or 37w IR MR16 lamps only (not included). See MR16 Addendum for lamp recommendations.

**Legend:**

1. Emergency ballast not applicable on lengths 3ft or less.
2. Multi-circuiting: submit multi-circuiting requirements during submittal process.
3. Standard on/off occupancy sensor: Wattstopper FS-205 with minimal 1" diameter.
4. Standard occupancy sensor with photocell: Wattstopper FS-205 wired for daylight harvesting. Requires 0-10V dimming ballast.
5. Lens is required for use in wet or natatorium locations.
6. T5/T5HO only, 1 lamp in cross section.
7. Fluorescent only. Staggered lamping not recommended with HTLO™.
8. LED only. "SH" optics recommended.

Mounting:

Flush gypsum/hard ceiling or wall. "Flangeless" appearance for gypsum or other hard ceiling/wall. Flange is not visible and is not factory-painted. Raw aluminum flange must be attached to blocking (by others), mudded over and painted by ceiling contractor for flangeless appearance.

Regressed flush gypsum/hard ceiling or wall. Same as above except flange raises lens up into ceiling. "RG" is 1" regressed resulting in a 4.5" height. Interior 1" regressed portion is exposed raw aluminum and visible unless finish is chosen. Contractor should apply ceiling paint if finish is not chosen.

Trim Flange. 1/2" visible powdercoated flange. Use for any gypsum or hard ceiling/wall that requires a minimal flange covering the ceiling cut-out edge. Choose finish color for trim flange.

T-Bar. Standard T-Bar/Grid Ceiling: 9/16" or 15/16" standard T-Bar or 9/16" slot ceiling. Raw aluminum flange sits on T-Bar, is not visible and is not painted. LED & T5 lamping available for all lengths; T8 available only in 4ft increments.

4" Armstrong Techzone™ / USG Logix™ or other 4" Utility Systems: Suitable for use in 4" on-center standard or slot T-Bar systems. Raw aluminum flange sits on T-Bar, is not visible and is not painted. The N4 option requires that the housing sit on top of the slot, creating a slightly recessed fixture. The T4 fixture will sit flush to ceiling.

Concealed Grid for Decoustic Ceilencio®: 2-3/4" panel/grid regress. Raw aluminum flange sits on T-Bar, is not visible and is not painted. LED & T5 only.

Shadowmold. Dual-flanged housing creates a 5/8" shadowed gap along wall/surface with choice of ceiling flange on opposite side for perimeter mounting. Gyp: LED, T5 or T8; T-Bar: LED or T5. Shadowmold spacer is painted black. Exposed side of housing next to wall is unpainted - housing may be field-painted if necessary.

"RG5": is intended only for perimeter mounting in gypsum ceiling. The 5" regressed gypsum flange on one side, with shadowmolding on the opposite side, results in a 8.5" overall height. Interior 5" regressed portion is exposed raw aluminum and visible unless finish is chosen. Contractor should apply ceiling paint if finish is not chosen.

Finish:

Electrostatically applied powder coat finish.

Construction:

60% recycled aluminum extruded housing. Steel endcaps with earthquake suspension cable attachment holes. Optional MRI housing configuration is specially built with all non-ferrous materials.

Listing:

UL/CUL, Damp or Wet Location.

Companion Luminaires:

D1 suspended, D2 suspended/wall, D3 suspended/ceiling/wall, D4 wall, D6 recessed.

9. MR16 modules. Each module adds 8" total to luminaire length. Indicate quantity and location within row. Submittals may be required.
10. Not available with staggered or dual lamping.
11. Staggered lamping not available on lengths less than 8ft. 8ft length uses 3-3ft lamps. 12ft uses 2-3ft and 2-4ft lamps.
12. Not available with LED.
13. The N4 mounting requires the housing to sit on top of the slot T-Bar creating a slight regress and will not sit flush to ceiling tile.

● OPTICAL SYSTEM

PMMA satin finish (0.060" nominal)

With efficiencies exceeding 80%, Air delivers softly diffused and ample illumination with a Satin lens which provides maximum glare reduction and light uniformity.

● SYSTEMS (S#)

Runs of AIR that are greater than 12ft in length are designated as systems (S#). This means that the run is comprised of a combination of sections to be assembled on site using our joining system. For more information on systems and joining, please refer to the AIR installation sheets available for download at www.axislighting.com

● OTHER MOUNTING OPTIONS

AIR is also available in pendant and surface mounted options.

i Specification sheets for all mounting options are available for download at www.axislighting.com

● SPECIFICATIONS**CONSTRUCTION**

Housing	Extruded aluminium (0.070" nominal)
Up to 70% recycled content	
End Cap	Die cast zinc (0.080" nominal)
Joiners	Die cast zinc (0.065" nominal)
Interior Brackets	Die formed Sheet Steel (18 gauge)
Reflectors	Die formed Sheet Steel (22 gauge)
Lens joiners	Die cast zinc (0.125" nominal)
Satin lens	Acrylic satin finish (0.060" nominal)

ELECTRICAL

LED Use of OptimaLED technology based on mid-flux LED

Input Voltage 120V, 277V, UNV.

Driver Dimming, HiLume, EcoSystem, DALI,

CRI Minimum 80 color rendering index

CCT Choice of 3000k, 3500k and 4000k color temperature with a great color consistency (within 3.5-step MacAdam ellipse).

LED life Minimum 50,000h with 70% of lumen maintenance in 25°C ambient temperature, in compliance with IES LM-80 testing measurements.

Thermal management

Aluminium housing acting as the heat spreader to maximize life.

Emergency Emergency battery pack or emergency circuit optional.

● FINISH

Aluminium paint, Powder Coated and custom finishes are also available.

● APPROVALS

Certified to UL and CUL standards

Meets ADA requirements.

Air LED WALL MOUNT**● INTEGRATED CONTROL OPTIONS**

AIR luminaires allow the use of integrated controls such as daylight sensors (DS), occupancy sensors (OS), individual daylight sensors and occupancy sensors (DS+OS), and combination daylight/occupancy sensors (DOS). These options can be seamlessly integrated into our luminaires. The control system could be used to optimize the lighting of the space by reducing energy consumption through daylight harvesting and occupancy, thereby improving the overall interior environment and allowing for LEED credits.

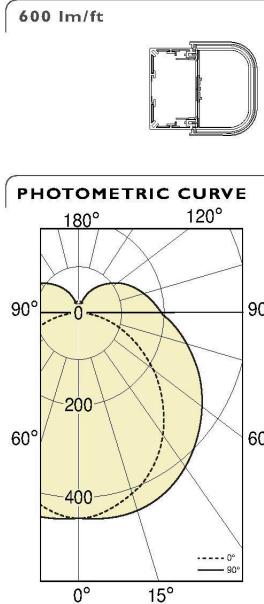

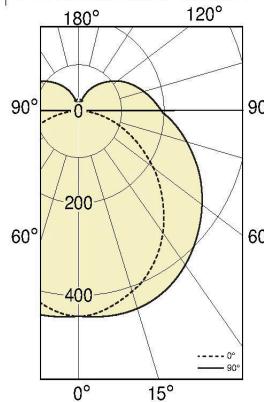

- Consult factory for other options.

● OPTICAL SYSTEM

PMMA satin finish (0.060" nominal)

With efficiencies exceeding 80%, Air delivers softly diffused and ample illumination with a Satin lens which provides maximum glare reduction and light uniformity.

● SYSTEMS (S#)

Runs of AIR that are greater than 12ft in length are designated as systems (S#). This means that the run is comprised of a combination of sections to be assembled on site using our joining system. For more information on systems and joining, please refer to the AIR installation sheets available for download at www.axislighting.com

● OTHER MOUNTING OPTIONS

AIR is also available in pendant and surface mounted options.

i Specification sheets for all mounting options are available for download at www.axislighting.com

● SPECIFICATIONS**CONSTRUCTION**

Housing	Extruded aluminium (0.070" nominal)
Up to 70% recycled content	
End Cap	Die cast zinc (0.080" nominal)
Joiners	Die cast zinc (0.065" nominal)
Interior Brackets	Die formed Sheet Steel (18 gauge)
Reflectors	Die formed Sheet Steel (22 gauge)
Lens joiners	Die cast zinc (0.125" nominal)
Satin lens	Acrylic satin finish (0.060" nominal)

ELECTRICAL

LED Use of OptimaLED technology based on mid-flux LED

Input Voltage 120V, 277V, UNV.

Driver Dimming, HiLume, EcoSystem, DALI,

CRI Minimum 80 color rendering index

CCT Choice of 3000k, 3500k and 4000k color temperature with a great color consistency (within 3.5-step MacAdam ellipse).

LED life Minimum 50,000h with 70% of lumen maintenance in 25°C ambient temperature, in compliance with IES LM-80 testing measurements.

Thermal management

Aluminium housing acting as the heat spreader to maximize life.

Emergency Emergency battery pack or emergency circuit optional.

● FINISH

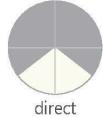

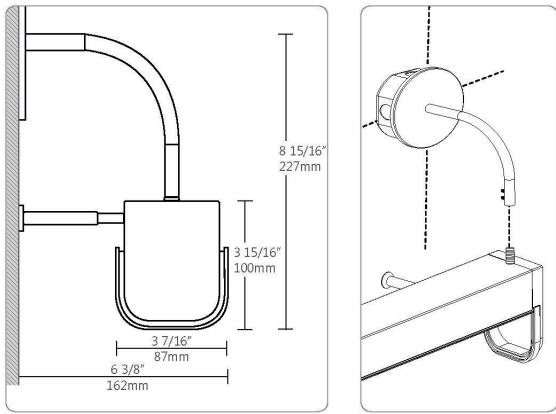

Aluminium paint, Powder Coated and custom finishes are also available.

● APPROVALS

Certified to UL and CUL standards

Meets ADA requirements.

Air LED WALL MOUNT**● INTEGRATED CONTROL OPTIONS**

AIR luminaires allow the use of integrated controls such as daylight sensors (DS), occupancy sensors (OS), individual daylight sensors and occupancy sensors (DS+OS), and combination daylight/occupancy sensors (DOS). These options can be seamlessly integrated into our luminaires. The control system could be used to optimize the lighting of the space by reducing energy consumption through daylight harvesting and occupancy, thereby improving the overall interior environment and allowing for LEED credits.

● OPTICAL SYSTEM

PMMA satin finish (0.060" nominal)

With efficiencies exceeding 80%, Air delivers softly diffused and ample illumination with a Satin lens which provides maximum glare reduction and light uniformity.

● SYSTEMS (S#)

Runs of AIR that are greater than 12ft in length are designated as systems (S#). This means that the run is comprised of a combination of sections to be assembled on site using our joining system. For more information on systems and joining, please refer to the AIR installation sheets available for download at www.axislighting.com

● OTHER MOUNTING OPTIONS

AIR is also available in pendant and surface mounted options.

i Specification sheets for all mounting options are available for download at www.axislighting.com

● SPECIFICATIONS**CONSTRUCTION**

Housing	Extruded aluminium (0.070" nominal)
Up to 70% recycled content	
End Cap	Die cast zinc (0.080" nominal)
Joiners	Die cast zinc (0.065" nominal)
Interior Brackets	Die formed Sheet Steel (18 gauge)
Reflectors	Die formed Sheet Steel (22 gauge)
Lens joiners	Die cast zinc (0.125" nominal)
Satin lens	Acrylic satin finish (0.060" nominal)

ELECTRICAL

LED Use of OptimaLED technology based on mid-flux LED

Input Voltage 120V, 277V, UNV.

Driver Dimming, HiLume, EcoSystem, DALI,

CRI Minimum 80 color rendering index

CCT Choice of 3000k, 3500k and 4000k color temperature with a great color consistency (within 3.5-step MacAdam ellipse).

LED life Minimum 50,000h with 70% of lumen maintenance in 25°C ambient temperature, in compliance with IES LM-80 testing measurements.

Thermal management

Aluminium housing acting as the heat spreader to maximize life.

Emergency Emergency battery pack or emergency circuit optional.

● FINISH

Aluminium paint, Powder Coated and custom finishes are also available.

● APPROVALS

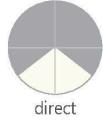

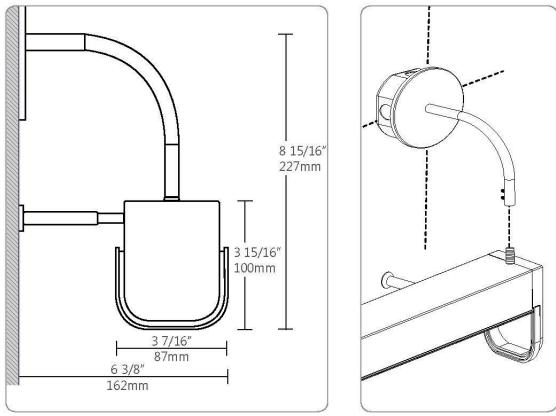

Certified to UL and CUL standards

Meets ADA requirements.

● OPTICAL SYSTEM

PMMA satin finish (0.060" nominal)

With efficiencies exceeding 80%, Air delivers softly diffused and ample illumination with a Satin lens which provides maximum glare reduction and light uniformity.

● SYSTEMS (S#)

Runs of AIR that are greater than 12ft in length are designated as systems (S#). This means that the run is comprised of a combination of sections to be assembled on site using our joining system. For more information on systems and joining, please refer to the AIR installation sheets available for download at www.axislighting.com

● OTHER MOUNTING OPTIONS

AIR is also available in pendant and surface mounted options.

i Specification sheets for all mounting options are available for download at www.axislighting.com

● SPECIFICATIONS**CONSTRUCTION**

Housing	Extruded aluminium (0.070" nominal)
Up to 70% recycled content	
End Cap	Die cast zinc (0.080" nominal)
Joiners	Die cast zinc (0.065" nominal)
Interior Brackets	Die formed Sheet Steel (18 gauge)
Reflectors	Die formed Sheet Steel (22 gauge)
Lens joiners	Die cast zinc (0.125" nominal)
Satin lens	Acrylic satin finish (0.060" nominal)

ELECTRICAL

LED Use of OptimaLED technology based on mid-flux LED

Input Voltage 120V, 277V, UNV.

Driver Dimming, HiLume, EcoSystem, DALI,

CRI Minimum 80 color rendering index

CCT Choice of 3000k, 3500k and 4000k color temperature with a great color consistency (within 3.5-step MacAdam ellipse).

LED life Minimum 50,000h with 70% of lumen maintenance in 25°C ambient temperature, in compliance with IES LM-80 testing measurements.

Thermal management

Aluminium housing acting as the heat spreader to maximize life.

Emergency Emergency battery pack or emergency circuit optional.

● FINISH

Aluminium paint, Powder Coated and custom finishes are also available.

● APPROVALS

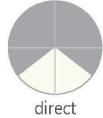

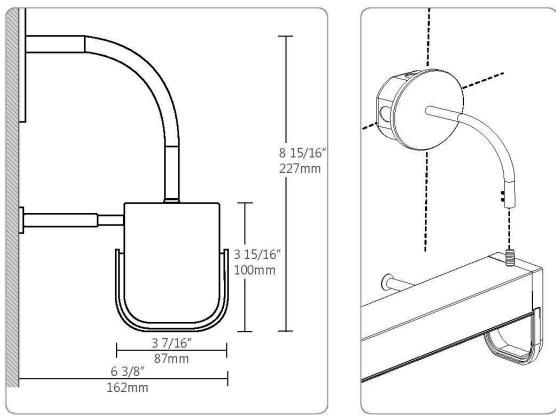

Certified to UL and CUL standards

Meets ADA requirements.

				*Row length - advise factory of row and pattern dimensions		DML 1% Lutron dimming	ADS acrylic dust cover
				Note: non-even lengths must use filler kits		DMD .1% DALI dimming	
						EML emergency battery (350-600 raw lumens)	

Features A prefabricated perimeter cove system offering an indirect wall wash effect. Using no louvers, the fixture illuminates walls while giving the ceiling the appearance of floating. Telescoping LED modules along with field trimmable extension kits allow for fully illuminated custom row lengths.

Construction The housing, available in 2-, 3-, 4-, 6- or 8-foot standard lengths, is made of 20-gauge steel. Trim flange is 1/16"-thick extruded aluminum.

Finish The standard housing and trim color is textured matte white (TMW) using polyester powder.

Electrical Must specify LED dimming controls. LED fixtures have constant current driver(s) with less than 20% THD when loaded to a minimum of 60%. Drivers sink a maximum of 6mA per driver. DM10 and DM01 LED drivers are 0-10V dimmable and are compatible with most 0-10V wall slide dimmers and direct 0-10V analog signal dimmers. Recommended wall dimmer is Leviton IP710 or equivalent. See data sheet to confirm all specified dimmers meet require specifications. Fixtures are ETL Damp labeled and I.B.E.W. manufactured. Maximum driver size is 1.625" width by 1.25" height.

Mounting Fixture is to be recess-mounted in either exposed T-bar or hard ceiling application(s).

Prudential reserves the right to change design specifications or materials without notice.

ColorBlast 6

10° clear lens

The original compact exterior LED wash fixture with intelligent color light

High-performance ColorBlast 6 LED fixtures generate rich, saturated colors and color-changing effects for a range of wall-washing and floodlighting applications. Designed with the needs of lighting designers, architects, and retail window directors in mind, ColorBlast 6 can be used in both indoor and outdoor installations. High-intensity LEDs produce superior light output in a compact, low-profile housing. ColorBlast 6 also offers full pan and tilt rotation, flexible mounting options, two beam angles, and superior control through Philips or third-party controllers.

- Two beam patterns — A frosted glass lens (21° beam angle) produces a soft-edge beam, while a clear glass lens (10° beam angle) affords extended light projection.
- Outdoor rated — Fully sealed for maximum fixture life and IP66 rated for outdoor applications, ColorBlast 6 fixtures meet or exceed specifications for use in wet locations. Rugged, die-cast aluminum housing is available in white or black powder-coated finish.
- Flexible mounting options — The versatile fixture canopy base can be mounted to a junction box or directly to a wall, ceiling, or floor. A liquid-tight cable fitting seals the canopy opening for use in damp or wet environments.
- Versatile light positioning — The locking canopy base offers friction-free rotation of up to 350°, and 110° fixture tilting lets installers quickly aim the fixture without special tools.
- Unified power and data cable — Each ColorBlast 6 fixture comes with a 60 ft (18.3 m) unified power and data cable to minimize wiring. ColorBlast 6 is intended for use with PDS-150e and PDS-60 24V power / data supplies.

- Industry-leading controls — ColorBlast 12 fixtures work seamlessly with the complete line of Philips Color Kinetics controllers, including iPlayer 3 Light System Manager, and ColorDial Pro, as well as third-party controllers.
- Additional options for controlling and dispersing light — Designed specifically for the family of ColorBlast fixtures by City Theatrical, Inc., accessories include top hats, half top hats, egg crate louvers, barndoors, and horizontal and vertical spread lenses.

For detailed product information, please refer to the ColorBlast 6 / ColorBlast 12 Product Guide at www.philipscolorkinetics.com/lis/colorblast6/

PDS-150e

Power / data supply for Ethernet and DMX installations

For device mounting and maintenance details, refer to the Installation Instructions included in the product packaging or download documentation from www.philipscolorkinetics.com/lsls/pds/pds150e/

PDS-150e is an indoor-rated power / data supply designed for LED lighting fixtures employing Chromacore technology from Philips Color Kinetics.

the unit from operating beyond its rated temperature range. 14 pre-formed knockout holes accommodate standard conduit sizes.

PDS-150e is compatible with both Ethernet and DMX controllers.

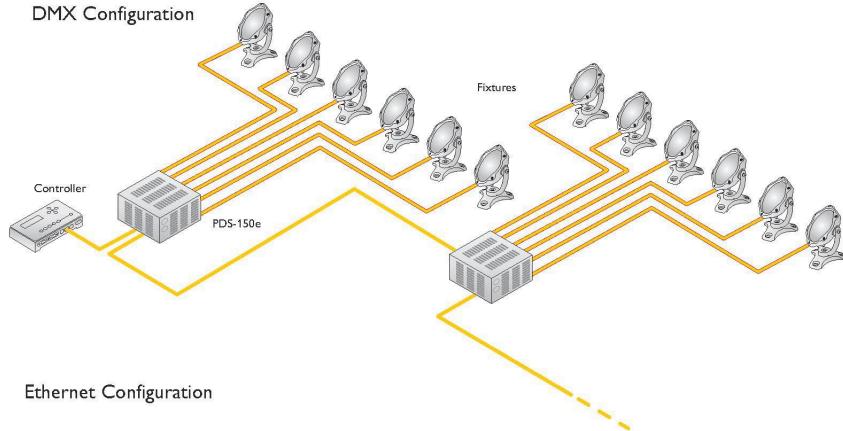

PDS-150e delivers 150 watts of total output via six output terminals and accommodates input voltages ranging from 100 VAC to 240 VAC. Short-circuit protection prevents device failure due to incorrectly wired fixtures.

The PDS-150e enclosure is designed for use in dry locations. The built-in cooling fan and over-temperature protection circuitry prevent

Specifications

Due to continuous improvements and innovations, specifications may change without notice.

Item	Specification	Details
Electrical	Input Voltage	100 – 240 VAC, auto-switching, 50 / 60 Hz
	Maximum Input Current	2.8 A at 115 VAC, 1.4 A at 230 VAC
	Power Output	24 VDC, 150 W maximum
Physical	Dimensions (Height x Width x Depth)	4.4 x 10.4 x 10.1 in (112 x 264 x 257 mm)
	Weight	8 lb (3.6 kg)
	Construction	Painted steel housing, surface mount design
	Finish	Black matte
	Connectors	Data RJ-45 input and output connectors Power (6) terminal blocks
	Power Input	Terminal block
	Temperature Ranges	14° – 122° F (-10° – 50° C) Operating 14° – 122° F (-10° – 50° C) Startup -40° – 176° F (-40° – 80° C) Storage
	Humidity	0 – 95%, non-condensing
	Cooling	Cooling fan
	Airflow	Rear panel input, side panel output
Certification and Safety	Heat Dissipation	25% of total power input at maximum load
	Data Input	Philips full range of controllers, third-party DMX controllers, or KiNET-compatible* third-party Ethernet controllers
	Certification	UL / cUL, FCC Class A, CE, PSE, C-Tick, SAA
Classification	Classification	UL Class 2 power supply
	Environment	Dry Location, IP20

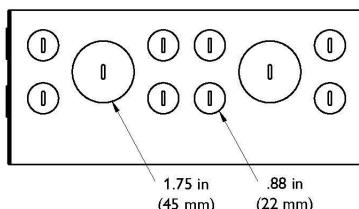

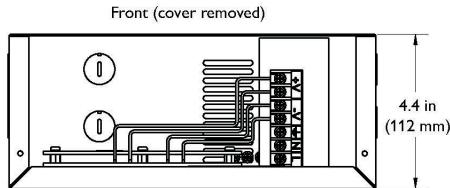

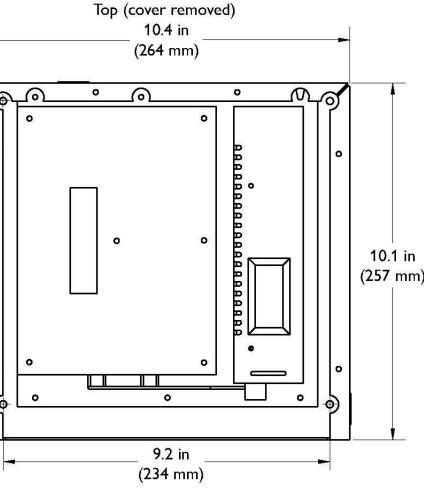

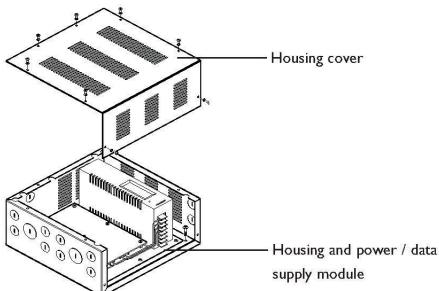

* KiNET is the Ethernet lighting protocol from Philips Color Kinetics.

Fixture Type:**F34****DESCRIPTION**

Ideal for task, accent, office, cove, and utility, under and above cabinet lighting display, the Halo Undercabinet low-profile design delivers maximum energy savings and life with easy installation. The integrated driver design allows 120V direct to the fixture for easy installation. Fixtures are available in 9", 18", 24", 36" and 48" lengths, the Halo system can be configured to fit almost anywhere. Each unit has an integrated on-off switch. Smooth dimming down to 5% using a standard dimmer*. Combination of direct wire to the fixture and connector cables provide for installation flexibility. Minimum Color Rendering Index (CRI) of 90 in 2700K, 3000K and 4000K color temperatures.

SPECIFICATION FEATURES**Even Light Distribution**

Specialized optical system consisting of tightly clustered proximity phosphor LEDs, advanced optical chamber coatings and lens materials resulting in soft illumination with very high efficiency. These fixtures are ideal for task lighting over glossy surfaces with no distracting shadow patterns.

Wiring Flexibility

Use any combination of three different wiring methods: Bring flexible conduit or Romex directly to either end of any size fixture. Conduit connector and romex strain relief hardware is included with each fixture. Utilize the available plug in connectors (sold separately) to link additional fixtures to the circuit or continue with flex conduit or romex (See instructions sheets for more detail).

Durable Low Profile Housing

Heavy gauge aluminum housing and color matched end caps with a 3/4" overall height.

Two Fastener Mounting

Each unit is secured directly to the mounting surface with just two fasteners keeping installation costs low. Can be mounted in horizontal and vertical orientations.

Continuous Runs

Link any combination of fixtures up to 450 W total load using available connectors.

Optional Accessories

Optional splice box has a connection port on each side to allow for runs in either or both directions. Includes Romex/ ½" conduit connector. Various connector cable options provide flexibility of mounting location.

Finish Options

Fixtures and accessories are available in both White (P) and Matte Black (MB) finishes.

Electronic Driver

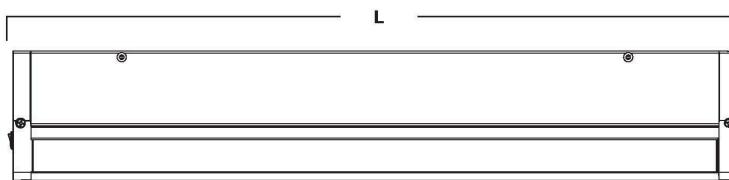

Electronic driver provides full light output, flicker free and noise free operation.

Kendo M | Linear illumination system

Extruded aluminum linear illumination system, Kendo M features specifically designed LED engine that provides constant illumination levels from the beginning to the end of the runs. Kendo M is suitable for cove lighting, architectural accents, under or above cabinets, display cases and many other applications. Available in sections up to 116" long with the option to extend up to 240" long with Kendo M Seamless runs in high output only (view last page). Class 2 listed for damp location installations. Approved for closet/storage space installation per NEC 410.16(A)(3) and 410.16(C)(5).

TYPE IC

Adjustable mounting bracket allows 90° tilt in both directions.

Mirror Ball Gold 40 Pendant

New addition to the Mirror Ball family. Vacuum gold metallised polycarbonate globe. Available in pendants: 50cm, 40cm and 25cm and in chrome.

Process	Mirror Ball Floor is formed using a technically advanced process of vacuum metallisation. The process involves vaporising a small amount of pure metal at a very high temperature and then sucking it on to a surface by applying an electrical charge. Extremely small holes can appear at times on the metal coating.	
Year of Design	2014	
Material	Polycarbonate

Back-Check No. 2

Jan 15, 2016

Fixture Type:**F43****FINO®****ASYMMETRIC WALL MOUNT INDIRECT LED****APPLICATIONS:**

Commercial and hospitality wall mounted indirect lighting for washing ceiling or floor

CONSTRUCTION:

2 pc construction: 5/8" deep extruded aluminum mud-in frame with gear and snap-in extruded aluminum optical assembly
 Fixture lengths available in 6" increments (minimum 1')
 Extruded latching system for hairline seams
 Field replaceable LED board

OPTICS:

6w/ft or 12w/ft LED boards
 Color Temp: 2700K, 3000K, 3500K, 4000K
 CRI: 80 typ
 Life: 50,000 hrs
 Lumen Maintenance: >70% of initial lumens @ 50,000 hrs
 Lumen output (3500K): 533 lm/ft (6w), 950 lm/ft (12w)
 Engineered optical performance lens with internal asymmetric high reflectance white reflector (standard)
 Optional Amerlux® exclusive designer lens for softer beam edges

ELECTRICAL:

Electronic constant current LED driver, 36" min., 8'-0" max. per driver. Must daisy chain min. 36" of fixture for short runs (driver on 1st fixture, daisy chain to others). 120v or 277v input
 0-10v dimming to 10%, driver is accessible by removing LED module

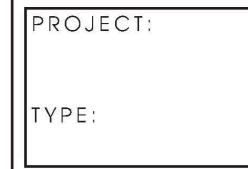

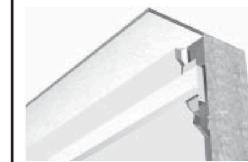

This product complies with IEEE C62.41 for surge endurance up to 2.5kV. Amerlux recommends using additional surge protection with this unit (supplied by others), surge damage is not covered by warranty.

MOUNTING:

For use in sheet rock walls
 Extruded latching system for hairline seams

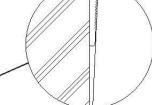

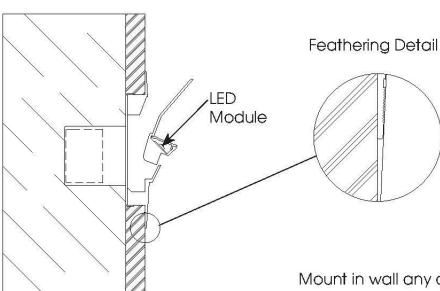

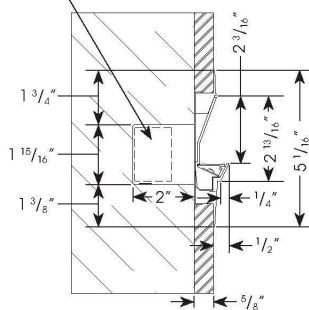

LABELING:

 UL
 For indoor use only
 IC rated
 Damp location

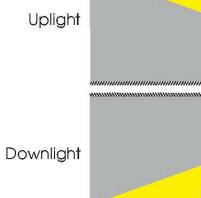

Electrostatic sensitive device,
 observe precautions for
 handling

Driver Compartment, fits between studs, sliding lateral adjustment (9" long)

Mount in wall any orientation

**ELECTRICAL**

Client: [REDACTED]
Project name: [REDACTED]
Order #: [REDACTED]
Type: [REDACTED] Qty: [REDACTED]

FEATURES AND BENEFITS

Physical :

- Low copper content extruded aluminum housing
- Available in 1', 2', 3' or 4' sections
- Electro-statically applied polyester powder coat finish
- Machined aluminum end caps and silicone gaskets
- Stainless steel hardware
- Standard straight leader cable output, bottom feed
- Clear tempered glass
- 10° x 10°, 10° x 60°, 30° x 60° or 60° x 60° optics
- IP66
- IK07 rated
- Corrosion-resistant option for marine environments
- Meets 3G ANSI C136.31 Vibration standard for bridge applications

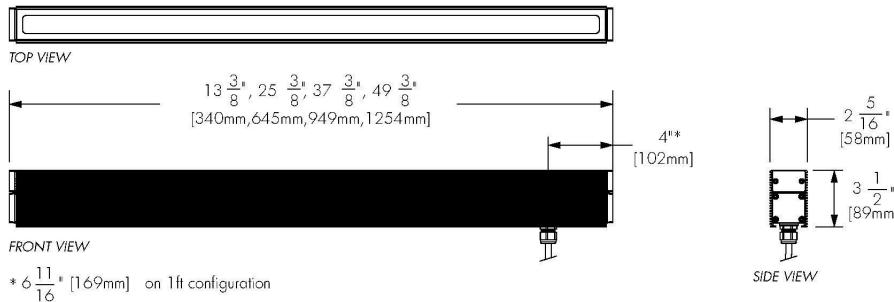

IK07

Performance :

- 2,041 delivered lumens and 10,415 candelas at nadir (RGB full white, 4' unit, 10° x 60° optic)
- Color mixing options: RGB (3 channels) or RGBW (4 channels)
- Lumen maintenance 120,000 hrs [L70 @ 25°C]
- Lumen measurements comply with LM - 79 - 08 standard
- Resolution per foot or per fixture (see page 4)
- Operating temperatures: -25° C to 50° C [-13F to 122F]

Electrical :

- Line voltage luminaire for 100 to 277V
- Power and data in 1 cable (#16-5)
- Standard 10ft /3m cord
- 17.25W/ft
- DMX 512 ready

5 year warranty

It must be specified on all DMX applications.
Refer to LID specification sheet for details.
- LTN** Lumentone is a simple pre-programmed DMX 512 controller
with a push button rotary dial and live feedback.

Control Boxes:

- CBX** DMX/RDM control box.
Up to six power and data outputs to fixtures or fixture runs.
Ethernet enabled option.
Refer to CBX specification sheet for details.

OPTION

A - 90° angle cord output
top feed

FEATURES AND BENEFITS

Physical :

- Low copper content extruded aluminum housing
- Available in 1', 2', 3' or 4' sections
- Electro-statically applied polyester powder coat finish
- Machined aluminum end caps and silicone gaskets
- Stainless steel hardware
- Standard straight leader cable output, bottom feed
- Clear tempered glass
- 10° x 10°, 10° x 60°, 30° x 60° or 60° x 60° optics
- IP66
- IK07 rated
- Corrosion-resistant option for marine environments
- Meets 3G ANSI C136.31 Vibration standard for bridge applications

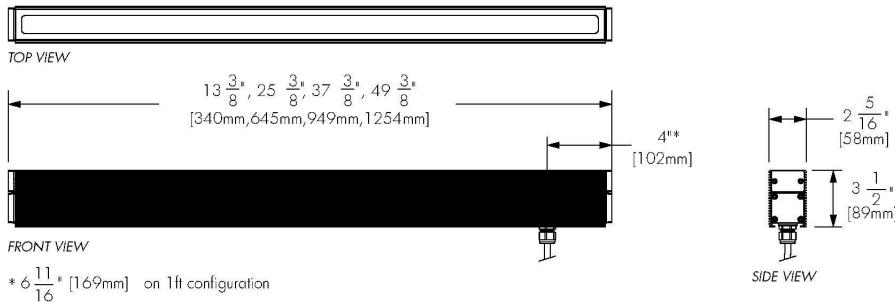

IK07

Performance :

- 2,041 delivered lumens and 10,415 candelas at nadir (RGB full white, 4' unit, 10° x 60° optic)
- Color mixing options: RGB (3 channels) or RGBW (4 channels)
- Lumen maintenance 120,000 hrs [L70 @ 25°C]
- Lumen measurements comply with LM - 79 - 08 standard
- Resolution per foot or per fixture (see page 4)
- Operating temperatures: -25° C to 50° C [-13F to 122F]

Electrical :

- Line voltage luminaire for 100 to 277V
- Power and data in 1 cable (#16-5)
- Standard 10ft /3m cord
- 17.25W/ft
- DMX 512 ready

5 year warranty

LUMEN MAINTENANCE

Designed to last with cool running mid-power LEDs projected to maintain 90% (L₉₀) of their initial output for 100,000 hours (at HO), and L₇₀ exceeding 150,000 hours.

LED SYSTEM LED modules and drivers are field replaceable.

PROG (optional) Programmable light output. Specify desired lumens or watts per linear foot. Min: 2.5 w/ft, consult factory for requests above 12 w/ft.

BINNING Standard binning (all Prudential LED boards) includes testing at the chip level and board integration to provide consistent color temperature within a 3-step MacAdam ellipse, with +/- 5% lumen output range and +/- .004 Duv.

PRUBIN™ (OPTIONAL) Prudential Ltg's exclusive 'job binning' method that ensures color temperature consistency across all luminaires on a project. Meticulously testing and labeling EVERY LED BOARD to +/- 25 lumens, +/- 50k CCT and +/- .004 Duv — while also separating positive from negative — allows us to match color, hue and intensity throughout a project and provides a consistent color temperature within a 2-step MacAdam ellipse.

LABELS

ETL damp labeled and I.B.E.W. manufactured

ELECTRICAL

Must specify LED dimming controls. LED fixtures have constant current driver(s) with less than 20% THD when loaded to a minimum of 60%. Drivers sink a maximum of 6mA per driver. DM10 LED drivers are 0-10V dimmable and are compatible with most 0-10V wall slide dimmers and direct 0-10V analog signal dimmers. Max driver size 1.65" w x 1.25" h.

CONSTRUCTION

Housing Die-formed 22-gauge steel, >20% PC recycled, 100% recyclable

End Caps Spring-fastened aluminum, >25% PC recycled, 100% recyclable

Lens Single-piece (up to 8' lengths) extruded acrylic, 100% recyclable

MOUNTING Surface mounted to walls or ceilings or suspended by cable

WEIGHT 2 lbs/ft

WARRANTY Single-source, 5 year limited warranty covers standard components and construction

Prudential Ltg. reserves the right to change design specifications or materials without notice. Please visit www.prulite.com for most current data.

DESCRIPTION

Architectural LED cylinder with specification grade reflector available in 6" aperture. Standard mounting options are: surface mount, wall mount and pendant. Consult factory for custom pendant lengths.

FEATURES

- Durable aluminum spun housing
- No visible hardware
- Available for surface, pendant or wall mount

LED LIGHT ENGINE

- System input power - 22W
- Nominal delivered lighting output = 1100lm
- 30° or 55° beam spread
- 2700K/3000K/3500K/4000K color temperature
- 83 CRI
- LED's mounted to die cast aluminum heat sink
- 50,000 of average rated life at 70% output
- Fixture should not be installed in applications with an ambient temperature above 50°C.
- Applications with an installation above 50°C will result in reduced lamp life and void warranty
- LED module is easily upgradable to accommodate future solid state lighting technology

OPTICAL SYSTEM

Innovative optical design: a controlled light distribution at a 55° cut off. Meets RP-1 requirements. No LED pixelation is visible. Specification grade reflector 1.5mm thickness. Available in multiple iridescent free architectural finishes.

ELECTRICAL SYSTEM

- 120V/277V 50/60Hz input
- 1040 mA constant current output
- Class 2 power supply
- Over-voltage, over current and short circuit protection: auto recovery
- MTBF > 100,000 hours

FINISHES

Cylinder housings are available in standard, powder coated finishes including black, silver or white. Cylinders feature optional high quality clear specular, haze or white reflector. Consult factory for custom finishes and additional reflector options.

ACCESSORIES

Open reflector compatible with decorative drop and Infuz[®] accessories. See accessories specification sheet.

MOUNTING

- Ceiling mount for direct installation to 3" and 4" octagon junction box or 4" square junction box.
- 144" Aircraft cable is supplied with complete canopy assembly. Aircraft cable is field cuttable and can be modified in the field.
- Wall mount bracket for installation to 4" octagon or square junction box.
- Pendant stems supplied with complete canopy assembly. Pendant stems are field cuttable and can be modified in the field.

LISTING/WARRANTY

- ETL listed to US and Canadian standards for damp locations
- 10-Year Intense LED Limited Warranty

LED Round Track Light

DESCRIPTION:

The MKS line of high quality, specification grade track lights are ideal for use where directional accent light is needed.

They are made of aluminum extrusion and can be powered using MKS track as well as many other manufacturers' currently installed track series. Utilizing the CREE CXA line of C.O.B. LED chips, the quality of light produced is second to none. With various options for optical beam spreads and color temperature choices ranging from 2700K through 5000K, the MKS track light series is the perfect choice for all of your track lighting needs.

FEATURES:

- Cameta™ Design: anti-glare, 80 lm/W
- COB LED + Cameta™: CREE COB LED, no shadows, strong penetrability
- High CRI 90 is available for 2700K/3000K
- Smooth dimming range from 100% to 10% without flicker, over 0.9 power factor
- Continuous 350° rotation and 90° pivot
- 50,000 Hours long life

ADAPTORS:

Eco Track

Description

ECO Track is a 1 circuit, 20A rated, line voltage track system. Its lightweight, compact elegant design is easy to install saving on overall project costs. The track is a 120V 1-circuit system with 1 neutral. The rail is constructed of extruded aluminum section and the live circuit and neutral conductors are made of heavy gauge copper. ECO Track can be surface mounted, on drop rods or wire pendant suspension. Offered in white, matte silver or black. End caps are included with each piece of track.

Tech Specs

- 2400VA maximum
- 120VAC input
- 20-amp circuit
- #12-gauge copper conductors are co-extruded in PVC insulator.
- Suitable for dry location only
- made for Bruck and listed under the name Global Trac.

Eco End Cap

Description

End Cap for Recessed Track Mount for Bruck's ECO track. Offered in white, matte silver or black.

Tech Specs

- made for Bruck and listed under the name Global Trac.

Lens Wall Washer, 4 1/2" Square Parabolic Trim

Xicato® XSM Remote Phosphor

MultiSource® Technology

Optics and Applications

Kurt Versen square LED wall washers are designed to illuminate walls uniformly with soft photometric patterns with excellent deep-shielded brightness control. The frosted fine micoprism spread lens projects light onto the wall surface creating a smooth appearance.

Design Features - MultiSource® Capable

Fixture housings are designed with MultiSource® plug and play connectors allowing field conversion to other sources. New lighting technologies will be incorporated as they become available assuring continuity. The fixture incorporates an aperture assembly which slides 1/4" in any direction and pivots 7° while maintaining optimum photometric performance. Proprietary passive heat sinks ensure proper temperatures are maintained. Service from below only. Maximum ceiling thickness is 1 1/2".

Modules

Xicato® XSM remote phosphor modules use high efficiency blue LEDs that convert to white light when directed through a phosphor lens. Fixture lumen packages are 1000 lm, 1300 lm, 2000 lm, 2400 lm and 3000 lm. Standard 80 CRI. 2700K, 3000K, 3500K, 4000K available. Rated Life is 50,000 hours at 70% lumen output.

Dimming Driver

Dimming is standard 0-10V/10%. See accessories for additional dimming options. Specify Voltage: 120 or 277.

Finish

Standard trim is anodized Softglow® clear. SoftSheen™ is a new finish that lowers apparent brightness due to remote phosphor sources. Colors available, see accessories. Steel parts are phosphate conditioned then painted matte black to suppress light leaks.

Warranty

5 year limited. See KV website for manufacturers details.

General

Fixture is pre-wired and thermally protected, UL and C-UL listed, for damp location and eight wire, 75°C, branch circuit wiring. All products are union made. Designed and manufactured in the USA.

B2555 Xicato® XSM 3000 lm 3000K Read Bottom Data

Notes

- Photometric Report: B2555 1000 lm KV Report No. 260356-A, 1300 lm LTL Report No. 260356, 2000 lm KV Report No. 102011, 2400 lm KV Report No. 51614, 3000 lm KV Report No. 51514-B.
- All data calculated with Softglow® clear trims and a micropism spread lens.
- If colored trims are required, only the lens trim will be tinted. The kicker reflector is always clear Alzak for maximum output and true color rendition. Multipliers should be used to correct brightness and downlight data only. Multiple units footcandles are correct as reported above.
- SoftSheen™ trim multipliers, contact factory.
- Softglow® colored trim multipliers, contact factory.

6 Data are cosine corrected to the plane of the wall. Uncorrected data are much higher and depend upon the angle of incidence to the wall which varies with the mounting distance from the wall.

7 Kurt Versen wall washers minimize hard shadow lines at the ceiling. Intensity increases gradually to just above eye level. The illuminated field is uniform and devoid of hot spots, striations and spikes.

8 Above data measure output of the wall washers only. No contribution from adjacent downlights or ceiling, floor or wall reflectances is included. Total illumination on the wall increases with the contribution from other sources.

9 The luminous efficacy (lm/W) refers to the total measured luminous flux (lumens) of the fixture divided by the total measured electrical input power (watts) of the complete fixture.

Lens Wall Washer, 4 1/2" Square Parabolic Trim

Xicato® XSM Remote Phosphor

MultiSource® Technology

Optics and Applications

Kurt Versen square LED wall washers are designed to illuminate walls uniformly with soft photometric patterns with excellent deep-shielded brightness control. The frosted fine micoprism spread lens projects light onto the wall surface creating a smooth appearance.

Design Features - MultiSource® Capable

Fixture housings are designed with MultiSource® plug and play connectors allowing field conversion to other sources. New lighting technologies will be incorporated as they become available assuring continuity. The fixture incorporates an aperture assembly which slides 1/4" in any direction and pivots 7° while maintaining optimum photometric performance. Proprietary passive heat sinks ensure proper temperatures are maintained. Service from below only. Maximum ceiling thickness is 1 1/2".

Modules

Xicato® XSM remote phosphor modules use high efficiency blue LEDs that convert to white light when directed through a phosphor lens. Fixture lumen packages are 1000 lm, 1300 lm, 2000 lm, 2400 lm and 3000 lm. Standard 80 CRI. 2700K, 3000K, 3500K, 4000K available. Rated Life is 50,000 hours at 70% lumen output.

Dimming Driver

Dimming is standard 0-10V/10%. See accessories for additional dimming options. Specify Voltage: 120 or 277.

Finish

Standard trim is anodized Softglow® clear. SoftSheen™ is a new finish that lowers apparent brightness due to remote phosphor sources. Colors available, see accessories. Steel parts are phosphate conditioned then painted matte black to suppress light leaks.

Warranty

5 year limited. See KV website for manufacturers details.

General

Fixture is pre-wired and thermally protected, UL and C-UL listed, for damp location and eight wire, 75°C, branch circuit wiring. All products are union made. Designed and manufactured in the USA.

Luminaire

- Continuous run of standard lengths (See technical pages for details)
- High performance optics
- UL STD 1598, wet location, driveover rated, 3000 lb static load
- Remote power supply
- Stainless steel construction 304
- Clear tempered glass 3/8" thick
- Installation housing, stainless steel 304 construction, direct concrete pour
- Cross section 1.96" (W), 3.62" (H)
- Supplied with oil and water resistant 3' feed cable standard, single color 18/2 AWG, RGB 18/4 AWG

Length

- 12 = 12.6" (324mm) OAL
- 24 = 24.4" (624mm) OAL
- 48 = 48" (1224mm) OAL
- R XX" (continuous run of standard lengths)

Power

- H = 12W/ft 3000K, 680 lm/ft
- H = 12W/ft RGB, 625 lm/ft
R185 lm/ft, G400 lm/ft, B40 lm/ft

Power Supply³ length x power (watts) = power supply (no enclosure, unless stated)**Non-Dim**

- D-520-24007: Osram 96W, 24VDC, 120-277VAC
- D-520-24006: Osram 10% 0-10V dimming, 96W, 24VDC, 120-277VAC
- IL-JB-LED-24003-120V-DFPN: Lutron LTE 1% Forward Phase (with neutral) dimming, 5-40W, 24VDC, 120VAC, Case K, dry location enclosure (not suitable for 48" fixtures)

- IL-JB-LED-24010-UNV-D3W: Lutron L3D 1% 3-wire dimming, 5-40W, 24VDC, 120-277VAC, Case K, dry location enclosure (not suitable for 48" fixtures)

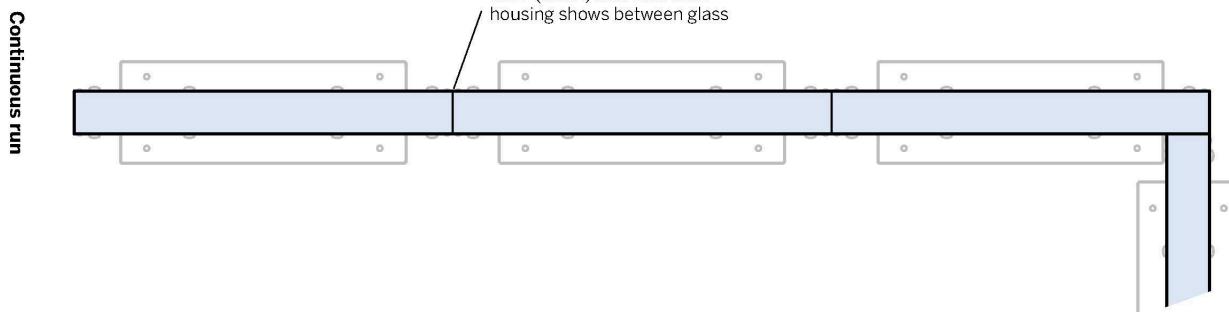

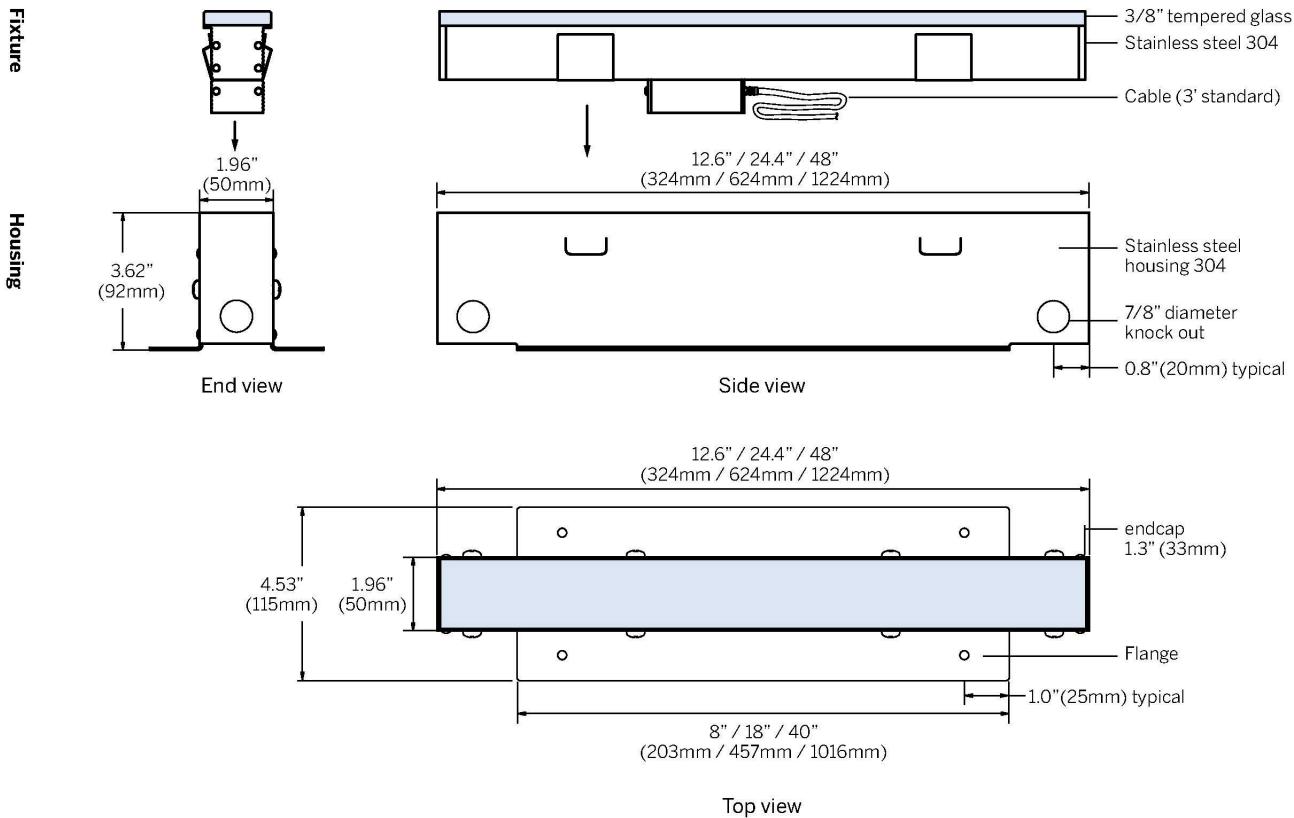

- IL-JB-LED-24010-UNV-DES: Lutron L3D 1% EcoSystem dimming, 5-40W, 24VDC, 120-277VAC, Case K, supplied in a dry location enclosure (not suitable for 48" fixtures)

RGB

- D-550-20003: EldoLED LIN100D2, CV 24V DMX/Sequencer Interface, requires a 24VDC driver ordered separately. (DMX control not included)

QUICKSHIP

EVOKE® 4.75 DOWNLIGHT

4.75" ROUND LENSED WALL WASH LED

Amerlux® QuickShip makes it possible not only to keep up with expectations, but to keep ahead of them. We help enhance your competitive edge, ensuring you can start installation more quickly than you thought possible.

We can ship within 5-10 business days of your Amerlux QuickShip order, depending upon the selection.

- QuickShip must be clearly marked on all P.O.'s.
- Must note on P.O. if requesting frames ship first.
- Standard shipping terms apply.
- See terms & conditions below.

Terms & Conditions

1. For QuickShip processing, please submit QuickShip items on separate purchase order and indicate "QuickShip" on order.
2. Configurations outside of what is displayed on the QuickShip program are not available under the QuickShip lead times.
3. Please contact Customer Support to process orders with quantities larger than those listed.
4. Orders will be entered within 24 hours of receipt of a clean purchase order. Lead times are calculated by business days from time of sales order confirmation. Orders will ship within QuickShip lead times or sooner.
5. Change orders and order cancellations cannot be processed after sales order confirmation is generated.
6. For freight allowed (greater than \$3,000), order will ship complete based on longest lead time item. Please indicate on PO if Partial Shipments are approved and indicate freight method. For partial shipments under \$3,000, customer will be invoiced for freight.
7. All Lead Times indicate when the fixture ships from Amerlux®. Arrival at destination is contingent upon carrier.

Expedite your orders by providing:

- Separate purchase order noting "QuickShip Program"
- Complete and accurate configurations
- Accurate pricing, quote number, shipping and contact information

Amerlux reserves the right to modify this program at any time.

EVOKE® ROUND LENS WALL WASH

4.75" ROUND LENS WALL WASH LED

TYPE:

E4.75RLW-A14
LED**DIMMING COMPATIBILITY:**

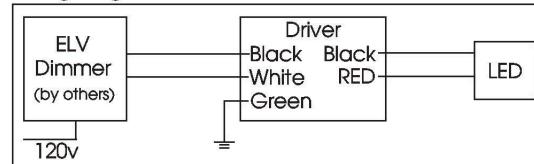

Amerlux® "Evoke 4.75" fixtures are compatible with all major dimming protocols prevalent in the United States. Please see below for general compatibilities and wiring diagrams. Amerlux recommends testing your unique dimming configuration as the exact full configuration (Dimmer, Fixture Quantity, Voltage, etc) may affect dimming performance.

ELV - Electronic Low Voltage (Reverse Phase) DIMMING (standard)

Utilizes specialized "ELV" dimmers. Best for New Construction applications

Notes:

- 120v or 277
- Dims down to less than 5% light output (most cases)
- Consult Dimming manufacturer for installation instructions - DO NOT SHARE NEUTRALS!
- Must meet dimmer Minimum Load Requirements

Wiring Diagram**Compatible Dimmers****Wall Box (ELV Style)**

Lutron "GP" Panel with PHPM-PA Interface	Lutron Grafix Eye QS with PHPM-PA Interface

TRIAC (Forward Phase) DIMMING (standard)

Utilizes "Standard" incandescent dimmers that are in wide use in installations across the US. Best for retrofit applications where Triac dimmers are installed.

Notes:

- 120v or 277v
- Dims down to less than 5% light output (most cases)
- Consult Dimming manufacturer for installation instructions - DO NOT SHARE NEUTRALS!
- Must meet dimmer Minimum Load Requirements per dimming manufacturer

EXTERIOR LINEAR WHITE LED

Manufacturer: COLOR KINETICS

Fixture Wattage: 60w

Fixture Line: VAYA

Fixture Voltage: 277 VAC

Fixture: LINEAR EXTERIOR MP (WHITE & MONO)

Load Type: Non-Dim

Catalog #: 912400130128

Mounting: SURFACE

Lamp Spec: LED, 3000K, 840 lm/ft

Fixture Specification Notes

- 1) PROVIDE LEADER CABLE AND BRACKET AS REQUIRED

Data sheet

PHILIPS**Vaya Linear MP, White & Mono**

Vaya Linear MP White & Mono is a reliable and cost effective LED lighting fixture designed for white or mono color lighting effects. With wide and elliptical beam options, Vaya Linear MP is ideal for wall washing and grazing applications. Two lengths and daisy-chain connectors make this product versatile and easy to use.

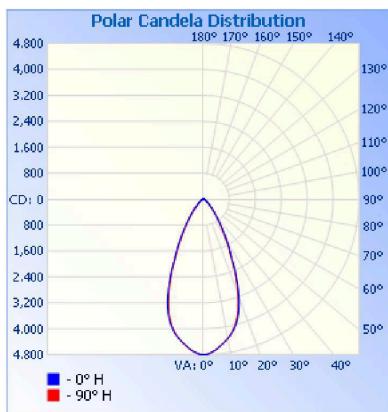

**Key Features**

- Reliable, cost effective LED lighting fixture
- Available in standard 3000K or 4000K
- Custom options: 2700K, 5000K, R, G, B, A
- Available with 10°x50° or 50° Beams
- Auto-ranging 100V – 277V, 50 / 60Hz input
- Interior / Exterior - IP66
- DLC-listed with 5 years limited warranty

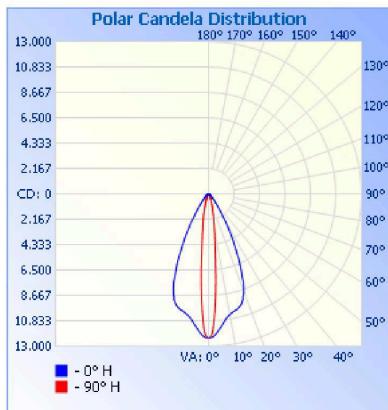

Product Data

Width	64 mm (2.5in)	
Height	102 mm (4.0in) including mounting hinge	
Length	310 mm (1 ft)	1210 mm (4 ft)
Mounting	Location adjustable and tilting surface-mount bracket	
Source	High-brightness White or Mono Color LEDs	
Beam Angle	Elliptical (10° x 50°) or Wide (50°)	
Luminous Flux	840 lumens	3,360 lumens
CRI	80Ra	
Efficacy	58 lm/W	
Lumen Maintenance	50,000 hrs L ₇₀ at 25°C	
Housing	Extruded aluminum, anodized finish RAL7043	
Weight	1.3 kg (2.85 lbs)	3.6kg (7.9 lbs)
Connection	Daisy-chain power input and output connectors	
Lens	Tempered Glass	
Control	On/Off, Not dimmable	
Input Voltage	100V – 277 VAC, 50 / 60Hz	
Power Consumption	18 W (White)	60 W (White)
Temperature Range	-20°C to 40°C (-4°F ~104°F) start-up temperature -40°C to 40°C (-40°F ~104°F) operating temperature	
Protection Rating	IP66, Wet location listed, IK06	
Certifications	UL / cUL, FCC Class A, CE, CB	
Warranty	5 Years

Juno Mini LED Step Lights make a big impression

For such a small fixture, Juno Mini LED Step Lights make a big impression. These architectural grade fixtures are about the size of a standard switch plate with an approximate aperture size of one-inch square, creating a unique, high-style appearance that blends seamlessly into its environment. An array of beautiful finishes completes the package. With their trendsetting design, extraordinary energy efficiency and long service life, Juno Mini LED Step Lights represent the new standard in upscale low-level lighting.

Shown in actual size

The perfect, **low-profile**
lighting solution for
virtually any application

The ultimate **versatility** in design

A little light goes a long way. The compact, unique and modular construction of the Juno Mini LED Step Lights provides solutions for a diverse number of applications. The IC-rated, all-in-one design includes the 3W LED light engine, 120-volt dimmable driver, optic and decorative face plate that all mount directly to a standard 2" x 4" junction box. Choose from four distinct optic designs and a selection of high-quality finishes.

Delivering modular flexibility for **vertical** or **horizontal** installations

Juno Mini LED Step Lights can be mounted in the wall either vertically or horizontally (shipped from the factory in the vertical position). Fixture orientation can be easily changed by simply removing the optic, rotating the mounting plate and re-installing in the horizontal orientation. The face plate easily attaches to the back plate with a single set screw. Juno Mini LED Step Lights provide unsurpassed flexibility for virtually any installation.

JUNO[®]

Performance Optics

Flexible options to meet your needs

Four striking optical designs satisfy a variety of illumination and aesthetic requirements.

All four optics create a one-of-a-kind lighting effect – ranging from a subtle pool of accent lighting to wide distributions ideally suited for steps and pathways. Juno Mini LED Step Lights are adaptable to a variety of low level applications.

Marker

Hood

Cutoff

Louver

The opal lens produces an attractive glow ideal for marking corridors or pathways.

Casts a pleasant pool of light at floor level while eliminating glare - ideal for theatre or auditorium lighting.

Balances low glare with a wide light pattern for steps and pathway lighting.

Integral louver provides superior shielding, making it an excellent choice for step lighting and other low level applications.

Finishes

Juno Mini LED Step Lights are available for both indoor and outdoor applications.

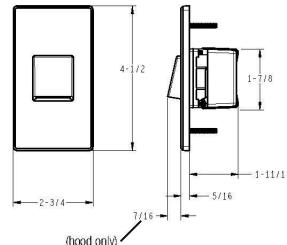

High-quality indoor finishes include plated bronze and satin nickel; outdoor/wet location units are finished with corrosion-resistant textured bronze or silver for superior durability. All fixtures are also available in white or black.

PRODUCT DESCRIPTION

The LMSW Mini LED step light is designed for installation in outdoor or indoor wall mount applications using standard junction boxes (not supplied) • IC rated for direct contact with insulating materials • Four distinct optics conceal LEDs and provide unique light distribution patterns • Modular design allows fixture to be mounted in horizontal or vertical orientation • Ideal for residential or commercial applications • Designed to provide 50,000 hours of life • 5 year warranty on LED components.

ENVIRONMENTALLY FRIENDLY, ENERGY EFFICIENT

- No harmful ultraviolet or infrared wavelengths
- No lead or mercury

PRODUCT SPECIFICATIONS

LED Light Engine Utilizes two 1-watt high lumen LEDs binned to Energy Star standards • 3000K or 4100K color temperatures are available • Mounted directly to aluminum heat sink for superior thermal management.

Optics Available in hood, cutoff, louver, and marker optics to conceal LEDs and provide four unique light distribution patterns • Fixture provided in vertical orientation from factory.

Faceplates May be mounted in vertical (as provided from factory) or horizontal orientation • Fastens using 0.05 allen wrench provided with fixtures • Available in textured silver, bronze, black and white corrosion resistant paint.

LED Driver Accommodates an input voltage of 120 VAC at 60Hz • Power factor > 0.9 at 120V input • Driver is dimmable with the use of Juno qualified 120V electronic low voltage dimmers.

Mounting Designed to mount directly in standard J-Boxes: 2" x 4" (2 1/8" minimum depth) or 4" x 4" (1 1/2" minimum depth) fitted with a single-gang plaster ring 5/8" minimum depth • Modular design allows fixture to be mounted in horizontal or vertical orientation • J-Boxes and plaster ring are not provided • Gasketed to seal against intrusion of water and other contaminants in wet locations.

Life Rated for 50,000 hours at 70% Lumen Maintenance.

Labels UL listed for wet locations and through-branch wiring, maximum 4 No. 12 AWG 75° C through branch circuit conductors for 2 x 4 junction box or maximum 8 No. 12 AWG 75° C through branch circuit conductors for 4 x 4 junction box • UL and cUL Listed, RoHS compliant • IP65 rated.

Testing All reports are based on published industry procedures; field performance may differ from laboratory performance.

Product specifications subject to change without notice.

Note: Vertical orientation shown.
All fixtures can be mounted in vertical or horizontal orientation.

**DIMMER COMPATIBILITY**

- Requires 120V AC electronic low voltage wall box dimmer
- Electronic low voltage dimmers require a neutral wire in the wall box • 100% to 20% or better dimming range depending on dimmer model with one fixture load minimum to maximum rated load for dimmer.

Juno qualified dimmers include:

Lutron® Model Numbers:

- Nova T® NTELV Series
- Skylark® SELV Series
- Diva® DVELV Series
- Maestro® MAELV Series
- Faedra® FAEVL Series
- Spacer System® SPSELV Series

Leviton® Model Numbers:

- Illumatech™ IPE04 Series
(dimmer has manual trim adjustment for low end of dimming range to achieve 5% dimming)

Driver Info

Color: Bronze

Weight: 4.5 lbs

**Technical Specifications****UL Listing:**

Suitable for wet locations. Suitable for mounting within 1.2m (4ft) of the ground.

IP Rating:

Ingress Protection rating of IP66 for dust and water.

LED:

Multi-chip, long-life LED.

Lifespan:

100,000-hour LED lifespan based on IES LM-80 results and TM-21 calculations.

Driver:

Constant Current, Class 2, 100-277V, 50/60 Hz., 4KV surge protection, 350mA, 100-240VAC 0.3-0.15 Amps, 277VAC 0.15Amps, Power Factor 99%.

THD:

10.4% at 120V

Input Watts:

14W.

Output Lumens:

1,019.

Color Accuracy (CRI):

82 CRI

Correlated Color Temp. (Nominal CCT):

3000K

Cold Weather Starting:

The minimum starting temperature is -40°F/-40°C.

Ambient Temperature:

Suitable for use in 40°C (104°F) ambient temperatures.

Thermal Management:

Superior heat sinking with internal Air-Flow fins.

Housing:

Precision die-cast aluminum housing.

Mounting:

Heavy-duty mounting bracket with hinged housing for easy installation.

Recommended Mounting Height:

Up to 8 ft.

HID Replacement Range:

The SLIM12 can be used to replace 70W MH based on delivered lumens.

Lens:

Tempered glass lens.

Reflector:

Specular thermoplastic.

Gaskets:

High-temperature silicone.

Finish:

Our environmentally friendly polyester powder coatings are formulated for high-durability and long-lasting color, and contains no VOC or toxic heavy metals.

ADA Compliant:

SLIM™ is ADA Compliant.

DLC Listed:

This product is on the Design Lights Consortium (DLC) Qualified Products List and is eligible for rebates from DLC Member Utilities.

SLIM12Y - continued

Dark Sky Approved:

The International Dark Sky Association has approved this product as a full cutoff, fully shielded luminaire.

Color Consistency:

3-step MacAdam Ellipse binning to achieve consistent fixture-to-fixture color.

Color Stability:

LED color temperature is warranted to shift no more than 200K in CCT over a 5 year period.

Color Uniformity:

RAB's range of CCT (Correlated Color Temperature) follows the guidelines for the American National Standard for Specifications for the Chromaticity of Solid State Lighting (SSL) Products, ANSI C78.377-2011.

Green Technology:

Mercury and UV free, and RoHS compliant.

IESNA LM-79 & LM-80 Testing:

RAB LED luminaires have been tested by an independent laboratory in accordance with IESNA LM-79 and LM-80, and have received the Department of Energy "Lighting Facts" label.

Patents:

The design of the SLIM™ is protected by patents in U.S. Pat D681,864, and pending patents in Canada, China, Taiwan and Mexico.

Country of Origin:

Designed by RAB in New Jersey and assembled in the USA by RAB's IBEW Local 3 workers.

Buy American Act Compliant:

This product is a COTS item manufactured in the United States, and is compliant with the Buy American Act.

Recovery Act (ARRA) Compliant:

This product complies with the 52.225-21 "Required Use of American Iron, Steel, and Manufactured Goods--Buy American Act-- Construction Materials (October 2010).

Trade Agreements Act Compliant:

This product is a COTS item manufactured in the United States, and is compliant with the Trade Agreements Act.

GSA Schedule:

Suitable in accordance with FAR Subpart 25.4.

SMART KUP

SMART KUP 82 LED GE

Smart kup is one of the 3 forms of the Smart family. The cone of the Smart kup ends in a fine trim. A trim particular Modular. The same subtle trim is used in several other Modular luminaires. The Smart family's styling is based on our most popular designs. Concretely this means that the luminaires consist of a light source (LED or halogen) which can be combined with one of three trims to suit your needs. The new spotlights can be combined with Smart mask, Smart surface box or surface tubed to form the perfect solution for any interior. Choose a white, black or gold finishing. Also available in different sizes, fix and adjustable, IP version, ...

SMART CAKE

SMART CAKE 82 LED GE

Smart cake is part of the Smart family. This family's styling is based on our most popular iconic designs. Its gently sloping sides ensure a soft distribution of light. Since its introduction in 2010, Smart has become an extensive portfolio with a broad range of accessories. Concretely this means that the luminaires consist of a LED light source which can be combined with one of three trims to suit your needs. The new spotlights can be combined with Smart mask or Smart surface box to form the perfect solution for any interior.

DDNG485 Network Gateway

Flexible network communications gateway for DyNet RS-485 networks

The Philips Dynalite DDNG485 is a flexible network communications bridge designed for RS-485 networks. The two opto-isolated RS-485 ports enable the DDNG485 to implement a trunk and spur topology on large project sites, with the bridge providing a high-speed backbone opto-coupled to many lower speed spurs.

- Electrical fault isolation — Faults can be isolated to individual network spurs.
- Route DyNet to third-party systems — Such as audio-visual and building automation systems, providing an integrated approach to total building control and energy management.
- DMX512 mode — Transmit or receive up to 64 channels of DMX512, with automatic DyNet conversion and task triggering. Provides temporary control of house lights from the DMX512 console in an auditorium scenario.
- Internal controls — Including programmable logic controller capable of assembly and transmission of user-defined data strings.
- Flexible mounting solution — DIN-rail mountable, designed to be installed into a distribution board or other electrical enclosure.

For detailed product information, please refer to the product information pages at www.philips.com/dynalite and follow the links.

	Packed Weight	0.25 kg
	Construction	Polycarbonate DIN-rail enclosure (6 unit)
	Operating Conditions	Temperature: 0 to 50° C ambient Humidity: 0 to 90% non-condensing
	Storage & Transport	Temperature: -25 to 60° C ambient Humidity: 0 to 90% non-condensing
Certification	Certification	CE, C-Tick
Options & Ordering	Standard Product	DDNG485 (Philips I2NC - 913703081209)

eDIN 4-WAY DMX512 OPTO-SPLITTER

#1002

PRODUCT OVERVIEW

An essential part of any permanent DMX512 distribution system, the DIN-rail mountable eDIN #1002 enables 'star' wiring configurations of DMX512 data lines. Each buffered output is isolated from the DMX input and protects all connected end-devices from harmful electrical faults and ground loops.

FEATURES

- One DMX512 input
- Four buffered DMX512 outputs
- One passive DMX512 thru connector
- Pluggable terminal blocks for all connectors
- Power and data easily daisy-chained between modules
- DMX IN indicator
- DC Power input indicator
- ISO 5V indicator
- Termination switch
- No fuses—self-resetting port protection recovers from voltage faults

SPECIFICATIONS

- 1500V opto-isolation between input and output ports
- 250V fault protection on input and output ports
- Input operating voltage: 9-30 VDC
- 5W power consumption
- Operating conditions: 0-40°C; 10-90% relative humidity, non-condensing

STANDARDS COMPLIANCE

- ANSI E1.11 DMX512-A(2008)/USITT DMX512(1990)
- CE/FCC
- RoHS 2002/95/EC
- Class 2 Low Voltage

WEIGHTS AND DIMENSIONS

- 0.50 lbs (0.26 kg)
- 3.6" W x 4.5" L x 1.5" H (91mm x 115mm x 38mm)

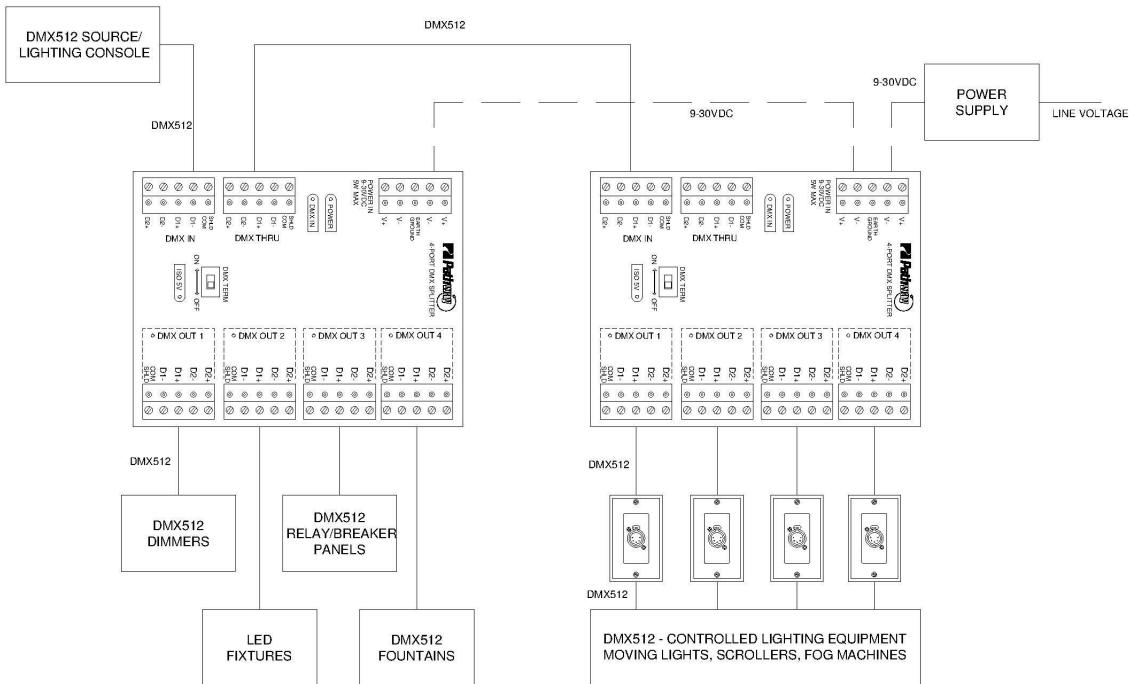

INCLUDED FURNISHINGS

- DIN tray (housing) with end caps
- 12" (300mm) x 35mm DIN rail
- Installation/Operations manual

eDIN #1002 Opto-Splitter

APPLICATION RISER

DMX512-A PINOUT:

XLR PIN #	PURPOSE
1	Shield
2	Data - (complement)
3	Data + (true)
4	Data - (pair 2 complement)
5	Data + (pair 2 true)

ORDERING INFORMATION

PART #	DESCRIPTION
1002	eDIN DMX512 Opto-Splitter, 1 in/4 out
ACCESSORIES	
1001-30	24VDC - 30W DIN-mountable Power Supply
1103	Rack-mount Panel Kit (2RU) with two 16.5" (420mm) sections of DIN rail
1105	Small eDIN Enclosure (NEMA1) with 9.5" (240mm) of vertical DIN rail
1106	Large eDIN Enclosure (NEMA1) with 19.5" (495mm) of vertical DIN rail
1107	Large eDIN Enclosure (NEMA1) with three rows of 9.5" (240mm) horizontal DIN rail
4000	eDIN Enclosure Assembly Service

Receptacles

Custom receptacle plates that ship from stock! Faceplates and inserts can be easily arranged in any configuration, to suit your requirements. In stainless steel or matte black.

FACEPLATES	Model
Single gang faceplate	5001 (SS/BL)
Double gang faceplate	5002 (SS/BL)
Three gang faceplate	5003 (SS/BL)
Four gang faceplate	5004 (SS/BL)
Five gang faceplate	5005 (SS/BL)
Six gang faceplate	5006 (SS/BL)

DMX512 CONNECTORS	Model
Male 5-pin XLR insert (M)	5101 (SS/BL)
Female 5-pin XLR insert (F)	5102 (SS/BL)
One Male, one Female 5-pin XLR insert (M,F)	5121 (SS/BL)
Two Male 5-pin XLR insert (M,M)	5122 (SS/BL)
Two Female 5-pin XLR insert (F,F)	5123 (SS/BL)
One Male 5-pin XLR, one Ethercon™ RJ45 insert	5141 (SS/BL)
One Female 5-pin XLR, one Ethercon™ RJ45 insert	5142 (SS/BL)

ETHERNET	Model
One Ethercon™ RJ45 insert	5105 (SS/BL)
Two Ethercon™ RJ45 insert	5115 (SS/BL)
One Ethercon™ RJ45, one Male 5-pin XLR insert	5141 (SS/BL)
One Ethercon™ RJ45, one Female 5-pin XLR insert	5142 (SS/BL)
One Ethercon™ Feedthru insert (female RJ45 jack on rear board)	5165 (SS/BL)

HANDHELD REMOTE [Strand]/REMOTE FOCUS UNIT [ETC]	Model
Female 6-pin XLR insert (ETC RFU)	5110 (SS/BL)
Female 6-pin XLR insert (Strand/Colortran HHR)	5111 (SS/BL)
Male 6-pin XLR insert (ETC RFU)	5112 (SS/BL)
Male 6-pin XLR insert (Strand/Colortran HHR)	5113 (SS/BL)
Two Female 6-pin XLR insert (Strand/Colortran HHR)	5124 (SS/BL)
One Male, one Female 6-pin XLR insert (Strand/Colortran HHR)	5125 SS
One Female 6-pin, one Male 5-pin XLR insert (Strand/Colortran HHR)	5131 SS
Two Female 6-pin XLR insert (ETC RFU)	5134 SS
One Female, one Male 6-pin XLR insert (ETC RFU)	5135 SS
